Mixed Mounting of VK300 and Manifold Base of Series VK3000

Type VV5K3-20

Type VV5K3-40

1. In the case of VV5K3-20/40

When installing the 3 port valve on the manifold base, plug the "R" port at the corresponding mark side with the rubber plug (VK3000-8-1) as shown in the figures on the right.

2. Other manifold

3 port valve except VV5K3-20 and 40 types can be mounted without any work.

Note 1) Remove the plug if changing the 3 port valve to a 5 port valve.

Note 2) In case a 3 port valve VK300 is mounted on the manifold base for a 5 port valve VK3000, switching type is normally closed (N.C.). If requiring a normally open type (N.O.), plug the "A" port on the 5 port valve.

Note 3) "A" port of a 3 port valve for base mounted type becomes "A" port of a 5 port valve. Plug that "A" port to avoid mistaking "B" port for the "A" port.

⚠ Precautions

Be sure to read before handling. For Safety Instructions and Solenoid Valve Precautions, refer to page 3-13-2.

How to Wire DIN Terminal

⚠ Caution

- Connection
- 1. Loosen the set screw and pull out the connector from the terminal block of the solenoid.
- 2. Remove screw and insert screwdriver into the slit area near the bottom of terminal block to separate block and housing.
- 3. Loosen the terminal screws (slotted screws) on the terminal block, insert the core of the lead wire into the terminal, and attach securely with the terminal screws.
- 4. Tighten the ground nut to secure the wire.

⚠ Caution

Use caution in wiring because it will not meet the IP65 (enclosure) standard if you use the other cord than prescribed heavy-duty cord of size (ø3.5 to ø7.5).
Tighten the ground nut and set screw within the specified range of torque.

- **Change of electrical entry (Orientation)**
After separating terminal block and housing, the cord entry direction can be changed by attaching the housing in the desired direction (4 directions in 90 increments).
* In the case of w/indicator light, avoid damaging the light with lead wire.

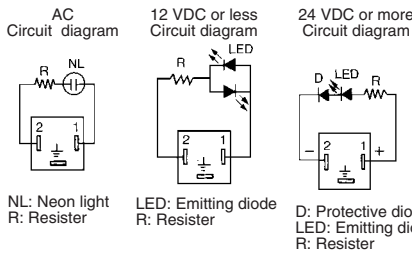

- **Precautions**
Plug a connector in or out vertically, never at an angle.
- **Applicable cable**

Valve Mounting Direction

⚠ Warning

When mounting a valve or spacer on the manifold base or sub-plate, etc., those mounting directions are determined. If mounted in the wrong direction, the equipment to be connected may cause malfunction. Refer to external dimensions in pages 3-2-4 to 3-2-10, and then mount it.

How to Calculate the Flow Rate
