

Pilot Operated 2-Port Solenoid Valve

Max. operating pressure differential

4.0 MPa

Fluid Compressed air, Nitrogen, Argon, Oxygen*1

*1 When using oxygen, please refer to "Fluid Supply" on page 4.

Low particle generation

Oil-free

IP67*2

*2 The DIN terminal is IP65.

Application Examples

Blow molding

Laser processing machines

Nitrogen filling unit

JSXH-X1

SMC
CAT.ES70-65A

Pilot Operated 2-Port Solenoid Valve JSXH-X1

Low particle generation

- No armature assembly collision
- Improved abrasion resistance
 - Increased rubber hardness (HNBR)
 - Poppet made from PUR
- No collision between metals due to bumpers

Power saving

Power consumption: 6 W

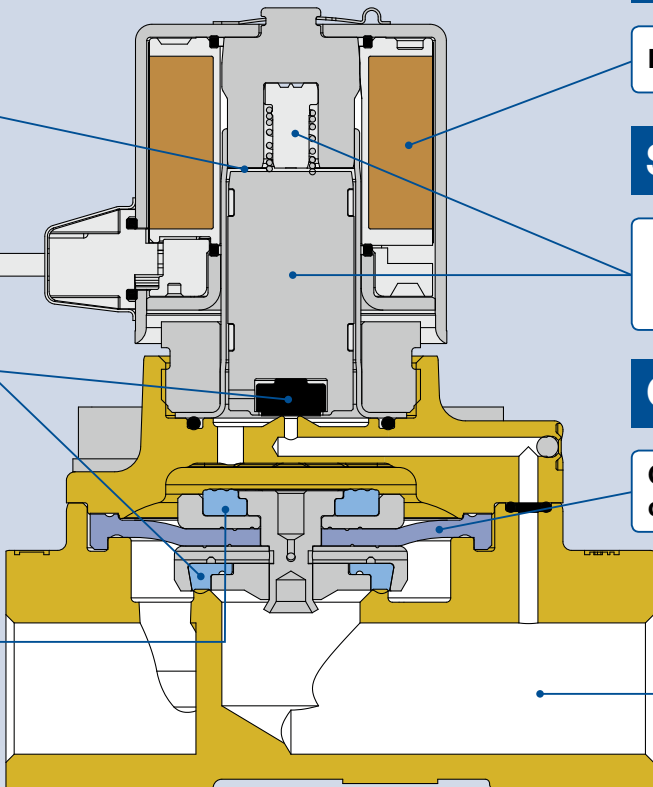

Stopper construction

- Metal noise reduced by the resin stopper
- Longer service life

Oil-free

Oil-free diaphragm construction

High flow rate and low pressure drop due to the optimised flow path through the body.

Easy maintenance

The coil can be replaced by simply removing the clip.

Improved environmental resistance

- Dustproof/waterproof IP67 structure
- With a stainless steel coil cover

Passed 1000 hours	Accelerated weathering test ISO 4892-3 (JIS K 7350-3) compliant
Passed 1000 hours	Ozone-proof exposure test ISO 1431 (JIS K 6259) compliant
Passed 960 hours	Combined cycle test ISO 14993 (JIS H 8502: 1999) compliant

* Please contact your local sales representative for more details.

Electrical Entry Variations

Specifications

Size		20	
Valve construction		Pilot operated diaphragm	
Valve type		Normally closed (N.C.)	
Fluid		Compressed air, Nitrogen, Argon, Oxygen	
Orifice diameter		16 mmø	
Port size		3/8"	1/2"
Flow rate characteristics*1	C [dm³/(s·bar)]	15	17.7
	b	0.36	0.22
	Cv	3.9	4.3
Max. operating pressure differential		4.0 MPa	
Min. operating pressure differential		0.15 MPa	
Fluid temperature		-10 to 50°C	
Ambient temperature		-10 to 50°C	
Leakage*1	Internal leakage	1 cm ³ /min or less	
	External leakage		
Thread type		G, Rc, NPT	
Max. system pressure		4.0 MPa	
Proof pressure		6.0 MPa	
Body material		Brass	
Degrees of protection		IP67 (IP65 for the DIN terminal)	
Seal material	Main valve	PUR	
	Pilot valve	HNBR	
Impact/Vibration resistance*2		150/30 m/s ²	
Mounting orientation		Unrestricted	
Weight*6	Grommet	3/8"	1/2"
		713 g	671 g
Rated voltage	AC	24 V, 48 V, 100 V, 110 V, 120 V 200 V, 220 V, 230 V, 240 V	
	DC	12 V, 24 V	
Allowable voltage fluctuation		±10% of the rated voltage	
Allowable leakage voltage	AC	5% or less of the rated voltage	
	DC	2% or less of the rated voltage	
Apparent power*3, *4	AC	8 VA	
Power consumption*3	DC	6 W	
Temperature rise*5	AC	70°C	
	DC	65°C	
Electrical entry		Grommet type, Conduit terminal DIN terminal, M12 connector	

*1 The value for air at a differential pressure of 0.15 MPa or higher and an ambient temperature of 20°C

*2 Impact resistance: No malfunction occurred when tested with a drop tester in the axial direction and at a right angle to the main valve and armature in both an energized and a de-energized state, once in each condition. (Value in the initial state)

Vibration resistance: No malfunction occurred in a one-sweep test between 5 and 2000 Hz. The test was performed at both energized and de-energized states in the axial direction and at the right angles to the main valve and armature. (Value in the initial state)

*3 Power consumption/Apparent power: The value at an ambient temperature of 20°C and when the rated voltage is applied (Variation: ±10%)

*4 There is no difference in the frequency and the inrush and energized apparent power, since a rectifying circuit is used in the AC.

*5 Temperature rise: The value at an ambient temperature of 20°C and when the rated voltage is applied. Use this value as a reference as the actual value varies depending on the ambient environment

*6 The values are for the grommet type. Add 20 g for the grommet type with PCB, 70 g for the conduit type, 50 g for the DIN terminal type, and 15 g for the type without a DIN connector and the M12 connector type.

Fluid Supply

⚠ Warning

- Compressed air, nitrogen, argon or oxygen can be used as a fluid.
- Do not use compressed air which includes chemicals, synthetic oils containing organic solvents, salt, or corrosive gases, etc., as this can cause damage or malfunction.
- If oxygen is used as the fluid, it can lead to serious and unforeseen risks. However, it is possible to manage and control the risk of hazards and economic loss. In order to use the product safely, it should only be handled by personnel with appropriate knowledge, with support from a suitably qualified specialist.
- Oxygen gas increases the susceptibility of substances to burning; Oxygen gas can be ignited by frictional heat and static electricity. If oxygen is ignited, the metal and seal materials burn. Therefore, flush the piping thoroughly and mount a suitable filter to prevent foreign matter such as metal powder and dust from entering the product.
- Take safety measures by installing safety devices (e.g. a circuit that stops the supply of oxygen gas) to prevent fire and explosion in the event of failure, taking flameproof safety standards into consideration.

JSXH-X1

Dimensions

G: Grommet

GS: Grommet with PCB

CS: Conduit

DS: DIN terminal DZ: DIN terminal with light

DN: Without DIN connector

WN: M12 connector/ Without connector cable

Safety Instructions

These safety instructions are intended to prevent hazardous situations and/or equipment damage. These instructions indicate the level of potential hazard with the labels of “**Caution**,” “**Warning**” or “**Danger**.” They are all important notes for safety and must be followed in addition to International Standards (ISO/IEC)*1), and other safety regulations.

 **Danger :** **Danger** indicates a hazard with a high level of risk which, if not avoided, will result in death or serious injury.

 **Warning:** **Warning** indicates a hazard with a medium level of risk which, if not avoided, could result in death or serious injury.

 **Caution:** **Caution** indicates a hazard with a low level of risk which, if not avoided, could result in minor or moderate injury.

*1) ISO 4414: Pneumatic fluid power - General rules and safety requirements for systems and their components
ISO 4413: Hydraulic fluid power - General rules and safety requirements for systems and their components
IEC 60204-1: Safety of machinery - Electrical equipment of machines - Part 1: General requirements
ISO 10218-1: Robots and robotic devices - Safety requirements for industrial robots - Part 1: Robots etc.

Warning

1. The compatibility of the product is the responsibility of the person who designs the equipment or decides its specifications.

Since the product specified here is used under various operating conditions, its compatibility with specific equipment must be decided by the person who designs the equipment or decides its specifications based on necessary analysis and test results. The expected performance and safety assurance of the equipment will be the responsibility of the person who has determined its compatibility with the product. This person should also continuously review all specifications of the product referring to its latest catalog information, with a view to giving due consideration to any possibility of equipment failure when configuring the equipment.

2. Only personnel with appropriate training should operate machinery and equipment.

The product specified here may become unsafe if handled incorrectly. The assembly, operation and maintenance of machines or equipment including our products must be performed by an operator who is appropriately trained and experienced.

3. Do not service or attempt to remove product and machinery/equipment until safety is confirmed.

1. The inspection and maintenance of machinery/equipment should only be performed after measures to prevent falling or runaway of the driven objects have been confirmed.
2. When the product is to be removed, confirm that the safety measures as mentioned above are implemented and the power from any appropriate source is cut, and read and understand the specific product precautions of all relevant products carefully.
3. Before machinery/equipment is restarted, take measures to prevent unexpected operation and malfunction.

4. Our products cannot be used beyond their specifications. Our products are not developed, designed, and manufactured to be used under the following conditions or environments. Use under such conditions or environments is not covered.

1. Conditions and environments outside of the given specifications, or use outdoors or in a place exposed to direct sunlight.
2. Use for nuclear power, railways, aviation, space equipment, ships, vehicles, military application, equipment affecting human life, body, and property, fuel equipment, entertainment equipment, emergency shut-off circuits, press clutches, brake circuits, safety equipment, etc., and use for applications that do not conform to standard specifications such as catalogs and operation manuals.
3. Use for interlock circuits, except for use with double interlock such as installing a mechanical protection function in case of failure. Please periodically inspect the product to confirm that the product is operating properly.

Caution

We develop, design, and manufacture our products to be used for automatic control equipment, and provide them for peaceful use in manufacturing industries.

Use in non-manufacturing industries is not covered.

Products we manufacture and sell cannot be used for the purpose of transactions or certification specified in the Measurement Act.

The new Measurement Act prohibits use of any unit other than SI units in Japan.

Limited warranty and Disclaimer/ Compliance Requirements

The product used is subject to the following “Limited warranty and Disclaimer” and “Compliance Requirements”.

Read and accept them before using the product.

Limited warranty and Disclaimer

1. The warranty period of the product is 1 year in service or 1.5 years after the product is delivered, whichever is first.*2)
Also, the product may have specified durability, running distance or replacement parts. Please consult your nearest sales branch.
2. For any failure or damage reported within the warranty period which is clearly our responsibility, a replacement product or necessary parts will be provided. This limited warranty applies only to our product independently, and not to any other damage incurred due to the failure of the product.
3. Prior to using SMC products, please read and understand the warranty terms and disclaimers noted in the specified catalog for the particular products.

*2) **Vacuum pads are excluded from this 1 year warranty.**

A vacuum pad is a consumable part, so it is warranted for a year after it is delivered.

Also, even within the warranty period, the wear of a product due to the use of the vacuum pad or failure due to the deterioration of rubber material are not covered by the limited warranty.

Compliance Requirements

1. The use of SMC products with production equipment for the manufacture of weapons of mass destruction (WMD) or any other weapon is strictly prohibited.
2. The exports of SMC products or technology from one country to another are governed by the relevant security laws and regulations of the countries involved in the transaction. Prior to the shipment of a SMC product to another country, assure that all local rules governing that export are known and followed.

Safety Instructions

Be sure to read the “Handling Precautions for SMC Products” (M-E03-3) and “Operation Manual” before use.

SMC Corporation
