

Regulator with Integral Pressure Gauge

Visibility of pressure gauge is improved in various installation places.

Series ACG

Series ARG

Installation and removal of pressure gauge cover is possible with one-touch. (PAT.PEND.)

Easy to adjust limit indicator.

Mounting angle of pressure gauge is selectable depending on the piping direction.

Mounting angle	0°	90°
Illustration of mounting angle		
Mounting angle	180°	270°
Illustration of mounting angle		

Pressure gauge anti-revolving mechanism (PAT.PEND.)

* Pressure gauge will not be revolved even after the handle is operated.

Space-saving, Labor-saving

Panel-cut for pressure gauge is not necessary.

In case of panel mounting, the number of holes for taking out the products (pressure gauge plus regulator handle parts) can be reduced into one location. By changing the angle of pressure gauge, the internal volume of a panel can be used effectively.

■ Mounting example: In case of aligning three ARG30 in line.

Mounting at 90° (In case of restricted inside direction)

Mounting at 45° (In case of considering the effectiveness of panel)

* Please contact us separately, since it will be made to order.

In case of ARG30, dimension in height can be reduced by approx. 30 mm.
