#### Manifold

Model	Applicable manifold type	Accessory
VO317□	Common or individual exhaust	O-ring (P10, 4 pcs.) <sup>Note)</sup> Bolts (M4 x 0.7 x 20, 2 pcs.)

Note) It is not applied to "Continuous duty type". Refer to the accessories on page 4-7-14.

# Series VT317

#### **Standard Specifications**

Type of actuation		Direct operated type 2 position single solenoid						
Fluid		Air						
Operating pressure range			0 to 0.9 MPa					
Ambient and fluid temperature	e	-10	to 50°C (No freezing. Refer to page 4-18-4.)					
Response time (1)		3	30 ms or less (at the pressure of 0.5 MPa)					
Max. operating frequency			10 Hz					
Lubrication		Not requi	ired (Use turbine oil Class 1 ISO VG32, if lubricated.)					
Manual override			Non-locking push type					
Mounting orientation		Unrestricted						
Shock/Vibration resistance (2)		150/50 m/s <sup>2</sup>						
Enclosure		Dustproof						
Electrical entry			Grommet, Conduit, Conduit terminal, DIN terminal					
	AC (50	0/60 Hz)	100, 200, 24 *, 48 *, 110 *, 220 *, 240 *					
Coil rated voltage (V)		DC	24, 6*, 12*, 48*, 100*					
Allowable voltage fluctuation			-15 to +10% of rated voltage					
Americant menuer (3)	AC	Inrush	19 VA (50 Hz), 16 VA (60 Hz)					
Apparent power (3)	AC	Holding	11 VA (50 Hz), 7 VA (60 Hz)					
Power consumption (3)	DC		Without indicator light: 6 W, With indicator light: 6.3 W					
Light/Surge voltage suppressor		AC	ZNR (Varistor), Neon bulb					
(Not applicable for grommet type)		DC	ZNR (Varistor), LED (Neon bulb for 100 V or more)					

Note 1) Based on dynamic performance test, JIS B 8374-1981. (Coil temperature: 20°C, at rated voltage, without surge suppressor)

Note 2) Impact resistance: No malfunction occurred when it is tested with a drop tester in the axial direction and at the right angles to the main valve and armature in both energized and de-energized states every once for each condition. (Values at the initial period)

Vibration resistance: No malfunction occurred in a one-sweep test between 45 and 1000 Hz.

Test was performed at both energized and de-energized states in the

axial direction and at the right angles to the main valve and armature.

(Values at the initial period)

#### Flow Characteristics/Weight

	Flow characteristics												M/aistht
Valve model	$1 \rightarrow 2$	$(P \rightarrow$	A)	$2 \rightarrow 3$	$(A \rightarrow$	R)	$3 \rightarrow 2$	$(R \rightarrow A)$	A)	$2 \rightarrow 1$	$(A \rightarrow$	P)	Weight
	C [dm3/(s·bar)]	b	Cv	C [dm3/(s.bar)]	b	Cv	C [dm3/(s.bar)]	b	Cv	C [dm3/(s·bar)]	b	Cv	Grommet
VT317													
VT317V (Vacuum spec. type)	2.4	0.26	0.62	2.6	0.34	0.67	2.8	0.25	0.67	2.5	0.37	0.66	0.29 kg
VT317E (Continuous duty type)													

Note 3) At rated voltage

Note) Values for a single valve unit. It differs in the manifold case. Refer to manifold specifications on page 4-7-14.

#### Option

#### Continuous duty type: VT317E

Exclusive use of VT317E is recommended for continuous duty with long time loading.

#### 

- This model is for continuous duty, not for high cycle rates. But even in low cycle rates, if energizing the valve more than once a day, please consult with SMC.
- **2.** Energizing solenoid should be done at least once in 30 days.

#### Vacuum spec. type: VT317V

This vacuum model has less air leakage than the standard model under low pressure. It is recommended for vacuum application.

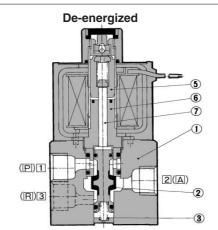

#### **▲** Caution

 Since this valve has slight air leakage, it can not be used for vacuum holding (including positive pressure holding) in the pressure container.

## Specifications different from standard are as follows.

Operating pressure range -101.2 kPa to 0.1 MPa

#### Construction

#### <Energized>

When an electric current is applied to the molded coil (4), the armature (5) is attracted to the core (6), and through the push rod (7), it pushes down the spool valve (2). Then, port (P) and port (A) are connected. At this time, there will be gaps between the armature (5) and the core (6), but the armature will be magnetically attracted to the core (6).

#### **Component Parts**

**Operation principles** 

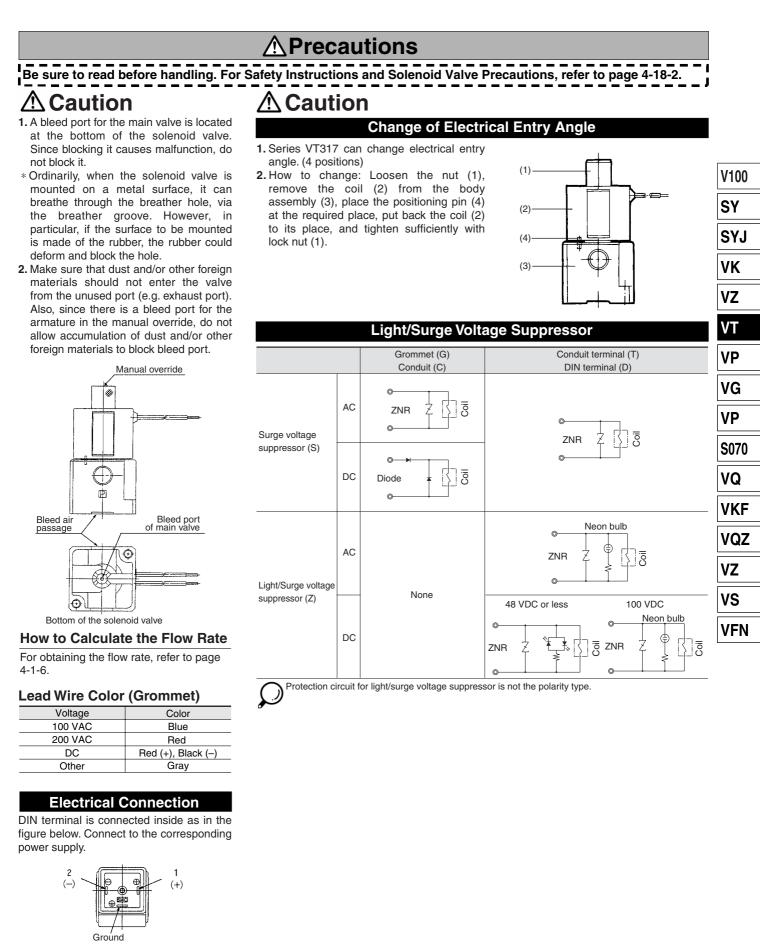

<De-energized>

R are opened.

No.	Description	Material	Note
1	Body	Aluminum die-casted	Color: Platinum silver
2	Spool valve	Aluminum, NBR	

Spool valve ② is pushed upward by the return spring ③, port P is closed, and port A and port

# Series VT317

#### How to Use DIN Terminal

#### 1. Disassembly

- After loosening the thread (1), then if the cover (4) is pulled in the direction of the thread, the connector will be removed from the body of equipment (solenoid, etc.).
- 2) Pull out the screw (1), then remove the gasket (2a) or (2b).
- 3) On the bottom part of the terminal block (3), there's a cut-off part (indication of an arrow) (3a). If a small flat head screwdriver is inserted between the opening in the bottom, terminal block (3) will be removed from the cover (4). (Refer to graph at right.)
- 4) Remove the cable gland (5) and plain washer (6) and rubber seal (7).

#### 2. Wiring

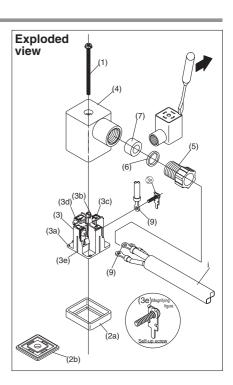

- Pass them through the cable (8) in the order of cable ground (5), washer (6), rubber seal (7), and then insert into the housing (4).
- 2) Dimensions of the cable (8) are the figure as below. Skin the cable and crimp the crimped terminal (9) to the edges.
- Remove the screw with washer (3e) from the bracket (3e). (Loosen in the case of Y shape type terminal.) As shown in the below figure, mount a crimped terminal (9), and then again tighten the screw (3e).
  - Note) Tighten within the tightening torque of 0.5 N·m ±15%.
  - Note: a It is possible to wire even in the state of bare wire. In that

case, loosen the screw with washer (3e) and place a lead wire into the bracket (3d), and then tighten it once again.

- b The maximum size for the round terminal (9) is 1.25 mm<sup>2</sup>—3.5 and for the Y terminal is 1.25 mm<sup>2</sup>—4.
- c Cable (8) external: ø6 to ø12 mm
- Note) For the one with the external dimension ranged between 9 to 12 mmø, remove the inside parts of the rubber seal (7) before using.

#### 3. Assembly

- Terminal box (3) connected with housing (4) should be reinstated. (Push it down until you hear the click sound.)
- Putting rubber seal (7), plain washer
  (6), in this order into the cable introducing slit on the housing (4), then further tighten the cable gland
   (5) securely.
- By inserting gasket (2a) or (2b) between the bottom part of the terminal box (3) and a plug on an equipment, screw in (1) on top of the housing (4) and tighten it.
- Note) Tighten within the tightening torque of 0.5 N·m ±20%.
- Note: The orientation of a connector can be changed arbitrarily, depending on the combination of a housing (4) and a terminal box (3).

#### Comparison between the Product Model No. and the Coil Part No.

Product model no.	Coil no.	Coil assembly with terminal part no				
VT/O317□-*G(-02)	PVT317-001GB-**					
VT/O317□-*GS(-02)	PVT317-*G					
VT/O317□-*H(-02)	PVT317-001GB-**L06					
VT/O317□-*HS(-02)	PVT317-*G-06					
VT/O317□-*C(-02)	PVT317-001CB-**					
VT/O317□-*CS(-02)	PVT317-*C					
VT/O317□-*T(-02)		PVT317-001TBT-**				
VT/O317□-*TS(-02)		PVT317-001TBTS-**				
VT/O317□-*TZ(-02)		PVT317-001TBTZ-**				
VT/O317□-*D(-02)	PVT317-001DB-**	PVT317-001DBT-**				
VT/O317□-*DS(-02)	PVT317-001DB-**	* PVT317-001DBTS-**				
VT/O317□-*DZ(-02)	PVT317-001DB-** PVT317-001DBTZ-**					

Note 1) \* mark in the product model numbers denotes the rated voltage.

Note 2)  $\square$  mark denotes the valve option.

Note 3) \* mark and \*\* mark are for coil part number and coil assembly with terminal the rated voltage.

Example 1) In the case of \*\* VT317-001GB-05

Example 2) In the case of \* PVT317-5G

## **Caution**

When the rated voltage is AC and if it is assembled with the coil for DC, response may be delayed and occur malfunction. Also, for DC valves, when the coil for AC is assembled, it occurs malfunction. For AC valves, assemble the coil for AC, and for DC valves, assemble the coil for DC.

#### **Connector for DIN Terminal**

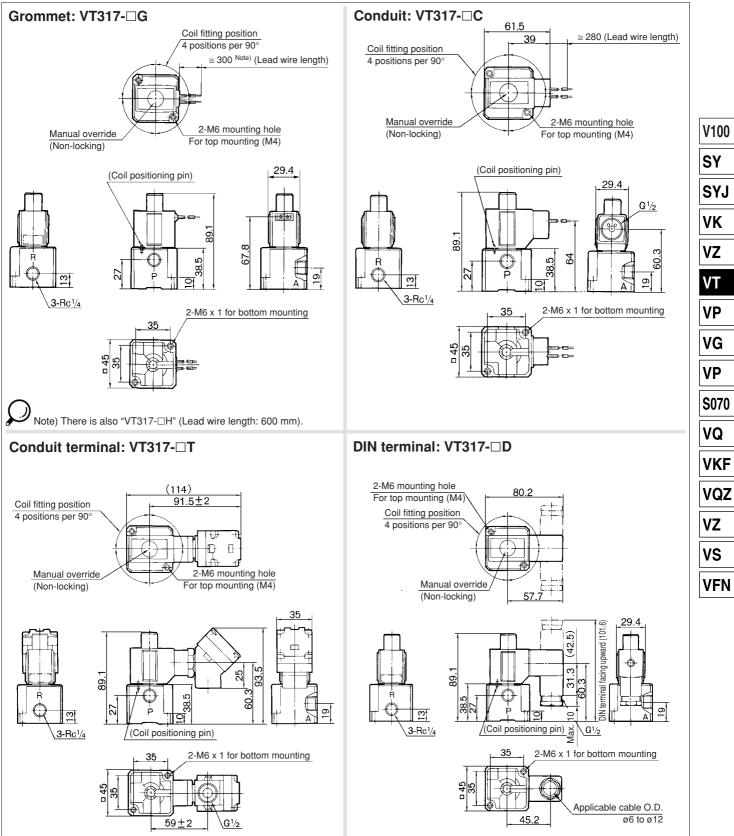

Rated voltage	Light/Surge voltage suppressor (D)	With surge voltage suppressor (DS)	Light/Surge voltage suppressor (DZ)
100 VAC		GDM2A-S1	GDM2A-Z1
200 VAC	GDM2A	GDM2A-S2	GDM2A-Z2
24 VDC		GDM2A-S5	GDM2A-Z5

For other rated voltages, please consult with SMC.

### 3 Port Direct Operated Poppet Solenoid Valve Rubber Seal Series VT317

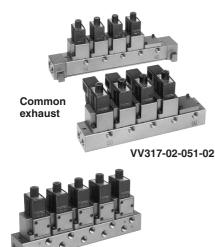

#### Dimensions

# Series VT317 Manifold Specifications

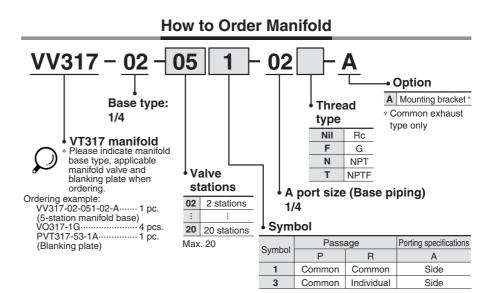

VT317 manifold is B mount style and available both as a common exhaust and individual exhaust model.

VV317-02-051-02-A

VV317-02-053-02

Individual exhaust

#### Manifold Specifications

Manifold t	Manifold type			B mount					
Max. num	Max. number of stations			20 stations (1)					
Applicable	Applicable solenoid valve				VO317□-□□□ <sup>(3)</sup>				
Exhai	Exhaust port			Port location (Direction)/Port size					
Symbol	Туре	Р		Р		R			
1	Common (2)	Base (Side) 1/4 (3/8)			Base (Side) 1/4	Base (Side) 1/4 (3/8)			
3	Individual	Base (Side) 1/4				$\frac{\text{Base (Side)}}{1/4}$			
1/4 $1/4$ $1/4$									

lote 1) For more than 3 stations, supply air both sides of P port. The common exhaust type should exhaust from both of the R port.

Note 2) In the case of common exhaust type, R and P ports size can be Rc 3/8 by using a mounting adaptor.

Note 3) Can also be applied to Series VVT320 manifold.

#### Accessory for Applicable Solenoid

Description	Part no.	Qty	Note
O-ring	P10	4	Standard type vacuum specifications type
O-IIIg	P10F	4	Continuous duty type
Hexagon socket head screw	Max. 0.7 x 20	2	

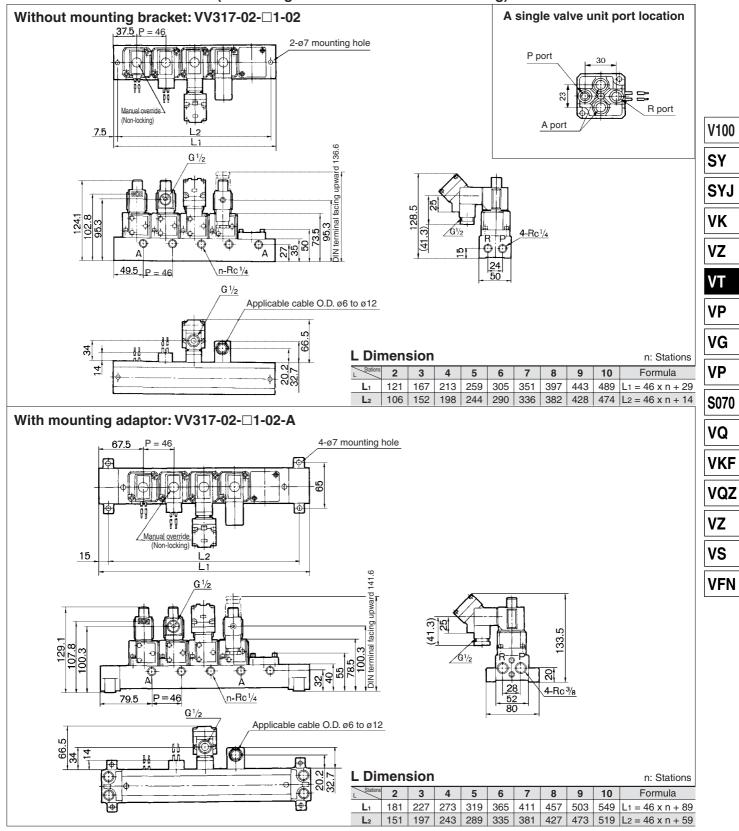

#### Option

### 3 Port Direct Operated Poppet Solenoid Valve Rubber Seal Series VT317

#### Dimensions: Common Exhaust (Interchangeable with VVT320 for mounting)

# Series VT317

#### **Dimensions: Individual Exhaust**

## **A**Precautions

Be sure to read before handling. For Safety Instructions and Solenoid Valve Precautions, refer to page 4-18-2.

#### Mounting

## \land Warning

1. When mounting valves on the manifold base, the mounting orientation is decided. If it is mounted in the wrong direction, connected equipment may malfunction. Mount it by referring to how to switch over from N.C. to N.O. specifications.

# 

- Each valve is fixed to the manifold base with two M4 mounting screws. Tighten the screws evenly when re-mounting. Tightening torque of the mounting screw (M4): 1.4 N·m
- **2.** For mounting, tighten M4 or equivalent screws evenly into the mounting holes of the manifold base.

#### Changing from N.C. to N.O.

## 

Universal porting permits convertibility N.C./N.O. by a simple 180 degree rotation. Mounting conditions for N.C. and N.O. is indicated as below figure.

Exhaust port type	N.C.	N.O.
Common exhaust		
Individual exhaust		

#### \* Changing from N.C. to N.O.

This product is delivered as N.C. valve. If N.O. valve is needed, remove mounting screws of the required valve and turn the valve at 180° degrees. (Make sure that there are O-rings fixed on 4 positions of the valve surface.) Then, tighten the mounting screws to fix the valve to the manifold base.
