

SMC! NOW!

SMC Corporation of America

Technical Development

SMC is recognized as the global technology leader in the pneumatics industry. Our staff of over 1,000 engineers located in technical centers in Japan, the US and Europe provide local support to customers through our local sales group. These local engineers are available to answer detailed technical questions, design customer specific specials and even develop new products and technologies. SMC believes their local presence is critical to our customer-focused product development process.

SMC's Global Engineering Network

The Tsukuba Technical Center has expanded to a new twin-tower building from where it will oversee worldwide technical development.

The Tsukuba Technical Center has expanded into its newly completed twin-tower building. At the center of SMC's research and development division, a staff of 1,000 is engaged in research and development activities for the entire world.

UTC (US Technical Center) U. S. A.

The UTC has been established to meet the project requirements of customers in North America.

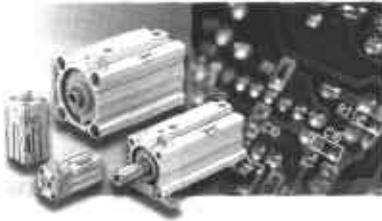

The UTC has approximately 100 engineers available for customer support.

ETC (European Technical Center) U. K.

The ETC was established in the existing SMC UK factory site in Milton Keynes.

Here, approximately 100 experienced engineers from SMC European subsidiaries are scheduled to be gathered to handle projects from their respective countries. This has enabled improved communication, faster and more accurate information, and a higher level of customer satisfaction.

Production & Supply

SMC currently offers over 11,300 basic products with over 560,000 variations.

*Continuous investment in production and supply chain improvements ensure
that these products are available to you when you need them.*

*The SMC Now! program is an important part of this supply chain system.
The program identifies product series and options that are commonly used in the
local market. These products are then made available through aggressive local
inventory of base components which can be quickly accessorized to offer a broad
range of finished product options. Increased local production capabilities
ensure that additional products and options as well as sudden increases in
demand, are quickly manufactured and shipped.*

*Overall, this gives SMC the ability to offer and supply the most comprehensive
product range available in North America.*

Sales & Communication Network

*SMC has established subsidiaries in 39 countries worldwide
with over 230 sales offices and 3,900 sales people.*

SMC believes that maintaining a strong local presence allows us to better understand and service the needs of our customers. In today's rapidly changing markets, increased expectations are the rule. By leveraging our strong local presence and global communication network, SMC helps our customers develop and maintain a competitive edge in some of the most aggressive markets.

Polyurethane 3-Dimension Tubing

Series **TIUB/TU**
& **TIA/T**

SMC Offers the Highest Dimensional Accuracy

- Continuous laser inspection of outside diameter during production
- Continuous monitoring of wall thickness

Polyurethane Tubing--Series TIUB/TU

Polyurethane tubing is fast becoming the ideal choice for pneumatic applications. It combines the elasticity of rubber with the chemical resistance normally reserved for plastics. Polyurethane can be put into two classifications, ester based and ether based. SMC offers both.

Ether-based polyurethane is the preferred tubing material for general pneumatic applications due to its immunity to hydrolysis and its higher resistance to fungus and microorganism attacks. The ester-based polyurethane is a stronger compound but tends to hydrolyze with moisture. This hydrolysis process will degrade the material over time.

SMC's primary line of Polyurethane tubing is ether based, made from the highest quality compound available to ensure the longest tubing life.

Properties

- Cut resistant
- Kink resistant
- Excellent memory
- Tear resistant
- Wide temperature range
- Abrasion resistant
- Low compression set
- Extreme flexibility
- Low gas permeability
- Good chemical resistance

Accessories

TK-1 Tube Cutter (.13mm tubing or less)
TK-2 Tube Cutter (.18mm tubing or less)
TK-3 Tub Cutter (Low Cost)
TG-1 Tube Release Tool (.04-.06mm tube)
TG-2 Tube Release Tool (.01/8"-.01/4" tube)

Nylon Tubing--Series TIA/T

Nylon was developed more than half a century ago and is considered to be the first man-made thermoplastic available. Deemed a rugged engineering plastic, its properties make it an ideal choice for a variety of applications. Nylon does not depend on moisture for flexibility and will not become brittle or swell because of water. Therefore it has excellent low moisture absorption and dimensional stability characteristics.

Nylon tubing for pneumatic applications is primarily made from Nylon 11, and more recently Nylon 12. Nylon 12 has virtually the same physical properties and performance as Nylon 11.

Properties

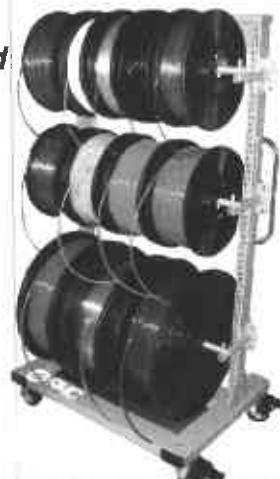

- Dimensional stability
- Light weight
- Low moisture absorption
- Wide temperature range
- Elastic memory
- High abrasion resistance
- High impact resistance
- Good flexibility
- High thermal resistance
- Broad chemical resistance

SMC Tubing Stand

TB-3VS Vertical Stand

Designed for high capacity and reel size flexibility. This stand comes with two cross bars. A third cross bar can be ordered separately. (TB-3CB)

Speed Controller

Series AS

Speed Controller with One-touch Fitting

Elbow Type/Universal Type/In-line Type

Minimizes installation time and cost

Reduces the mounting height and enables compact machinery design. Effective area is larger than the former model.

■ Tube swivels 360°

Universal type permits 360° piping swivel.

■ Applicable tubing

Nylon, soft nylon, and polyurethane tubing are applicable.

- Metric size (Release bushing: White color)

ø3.2, ø4, ø6, ø8, ø10, ø12

- Inch size (Release bushing: Orange color)

ø1/8", ø5/32", ø3/16", ø1/4", ø5/16", ø3/8", ø1/2"

■ Maximum operating pressure 1 MPa max.

■ Retainer prevents accidental loss of needle

■ Option

- Hexagonal lock nut, Nickel plated option

- Number of needle rotations has been increased (8 to 10 turns)

The increased number of needle rotations permits easy control at low speeds.

Elbow Type

Universal Type

In-Line Type

Standard Type (Metal Body)

Elbow Type/In-line Type

Minimizes installation time and cost

Fittings and tubing are not necessary because this type screws directly into the actuator. Thus, piping labor and cost can be eliminated.

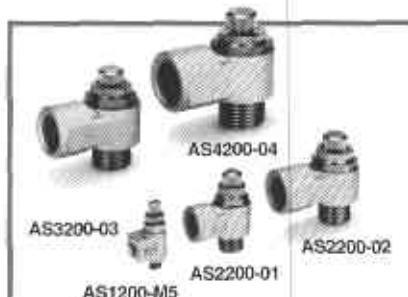

■ Body swivels 360°

Swivel type allows free setting of piping.

■ Speed may be accurately controlled even at low speeds.

■ Able to control and set a constant speed easily.

■ Retainer prevents accidental loss of needle.

Elbow Type

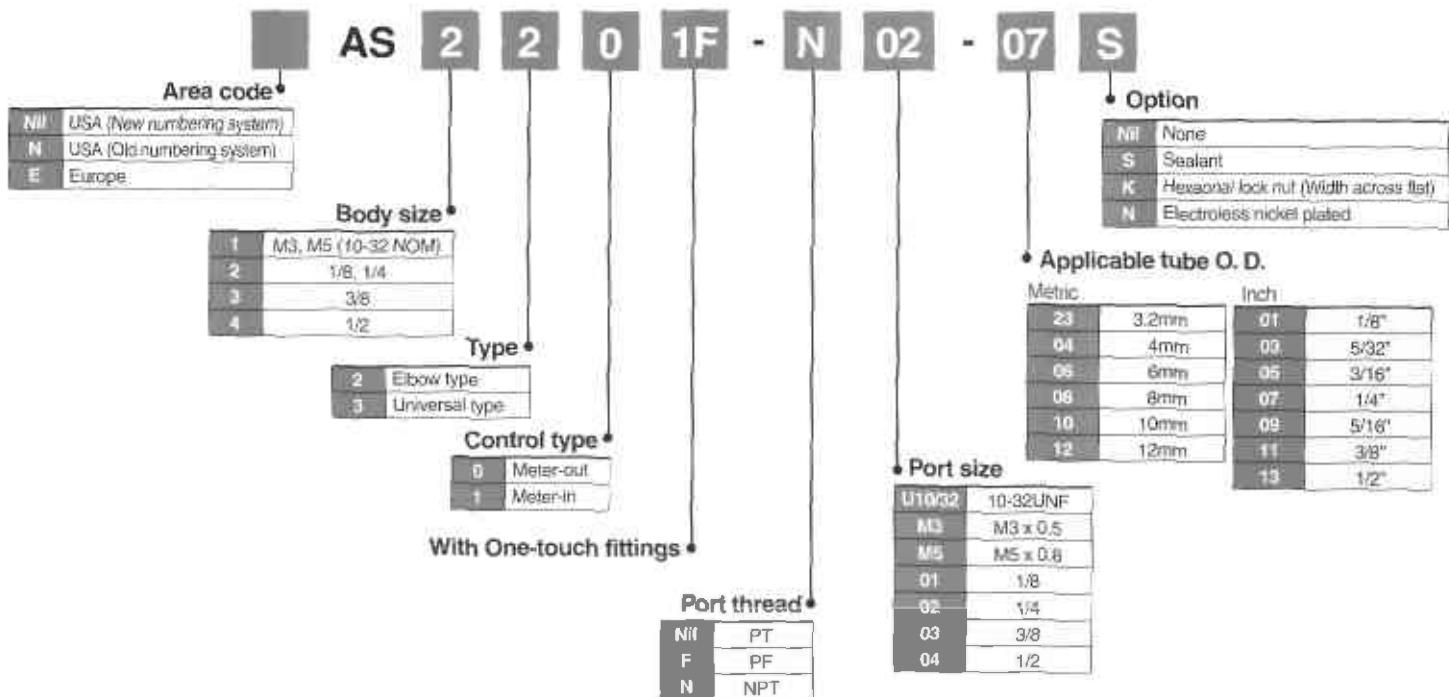

In-line type

Speed Controller**How to Order****Speed Controller Standard Type (Metal Body)****Elbow Type****In-line Type**

One-Touch Fitting

Series KQ2

Large Tube Insertion Depth

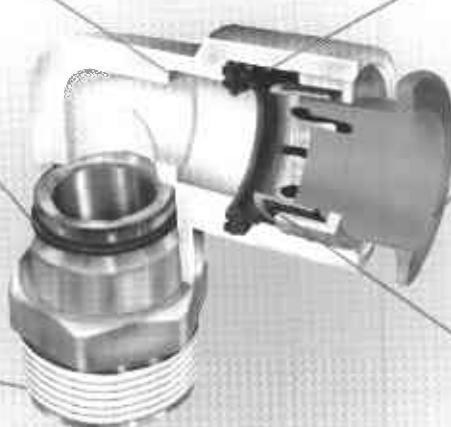

Space to compensate for tubing that is not cut square, eliminating associated leakage

Easy Fitting and Adjustment

The o-ring and barbed design allows the fitting to rotate into the desired position upon installation

Pre-Applied Sealant

Eliminate the labor and the contamination that may occur when applying sealant

Special Tube Seal Design

Designed to insure positive seal against tubing in rugged applications and easy release vs. a standard o-ring

Large Release Button

The release button ensures easy release of tubing. When depressed the sleeve engages the chuck to release its grip, allowing the tube seal to separate

Stainless Steel Chuck

Allows smooth insertion in one direction and creates excellent gripping the other direction

Modular FFB - Ultra

Series AC

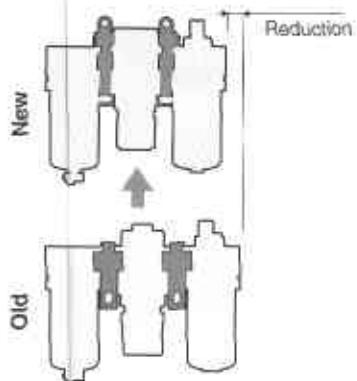

Basic Features

- Improved flow characteristics
- Built-in gauges
- Easier assembly
- Improved ozone resistance
- Larger bowl capacities
- Improved lubricator adjustment
- Better water removal and increased filter life
- Better auto drains

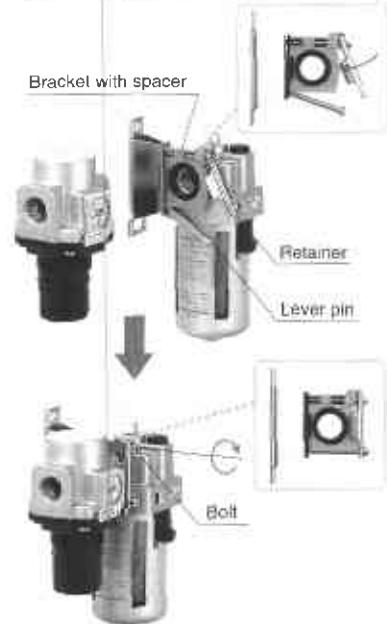

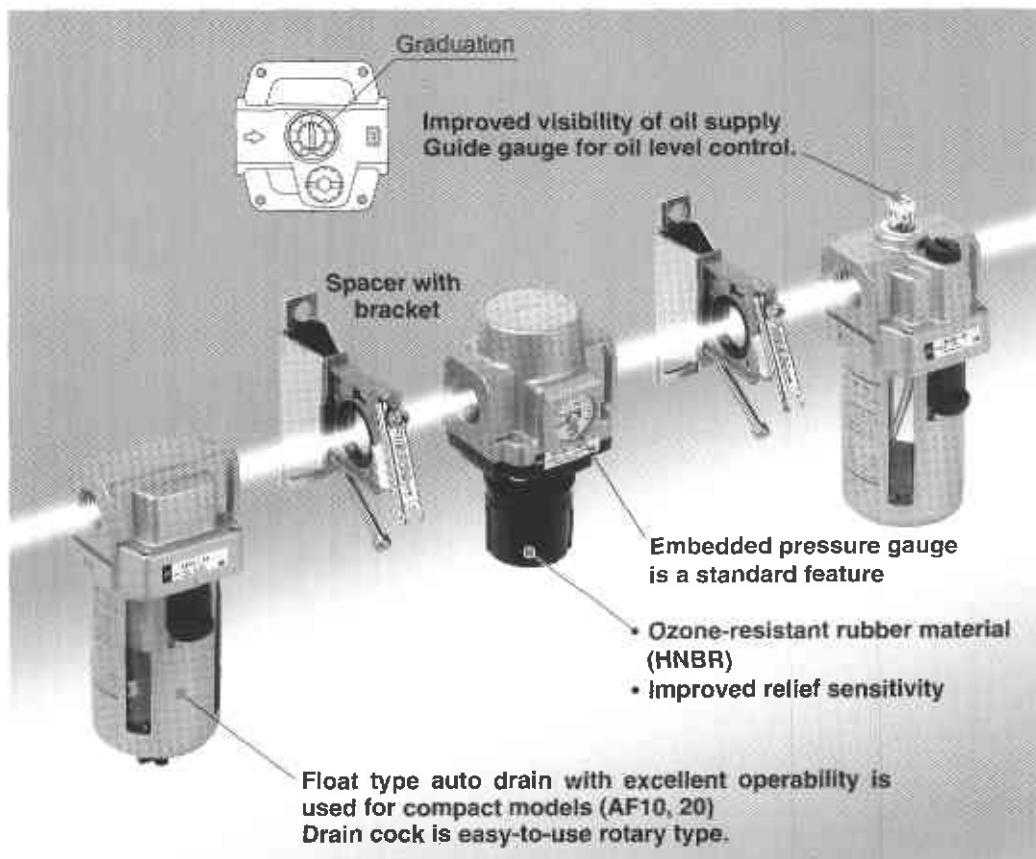

Space-saving Design

The use of compact spacer with bracket reduces the total assembled space.

	Panel mount (with set nut)	AR10 to 40, AR20K to 40K

Note 1) Bracket assembly is not mounted at the time of shipment, but rather packaged together with the regulator.

Note 2) Mounting threads for pressure gauge: AR10-1/16; AR20 to 30-1/8; AR40 to 60-1/4

Pressure gauge is not mounted at the time of shipment, but rather packaged together with the regulator.

How to Order

AW 30 F 03 BE 1N X465A

Filter regulator

Body size

10 20 30 40

With back flow mechanism

NII	Standard
K	Backflow mechanism

Note) AW10 comes with a back flow

mechanism as a standard feature.

If the set pressure is below 0.15MPa,

back flow may not occur. When a

back flow mechanism is required with

a set pressure of less than 0.15MPa,

contact SMC.

Thread type

NII	Rc
N (Non-R)	NPT
G (Non-G)	G

Note 1) Drain guide is NPT 1/4
(applicable to AW30K and 40K),
and the exhaust port for auto
drain comes with ø3/8"
One-touch fitting (applicable to
AW30K and AW40K).Note 2) Drain guide is G 1/4 (applicable
to AW30K and AW40K).

VHS50	Y600	Y600T	AC50, AC60 <small>Note)</small>

Note) Although connection to AC60 is possible, the flow rate may decrease due to the mounting position.

Pressure Regulator 3 Port Valve with Locking Holes

How to Order

Large knob

Utilizes an oversized knob for simple operation.

Key hole for locking out knob

Attaching a key or tag locks out air supply.

Manually operated valve can be used to prevent accidents caused by residual pressure in pneumatic lines.

The supply/exhaust status of the air flow can be verified at a glance in the indicating window.

SUP : Supply

EXH : Exhaust

Can prevent accidents due to inadvertent air supply.

When in the exhaust position, the valve may be padlock secured. Prevents accidental start-ups while personnel are cleaning or servicing equipment.

OSHA standard (Occupational Safety and Health Administration Department of Labor)

For safety control, OSHA rule requires energy sources for certain equipment be turned off or disconnected and that the device either be locked or labelled with a warning tag.

Miniature Cylinder

Series NCJ2/CJ2

Bore sizes: 6mm, 10mm, 16mm

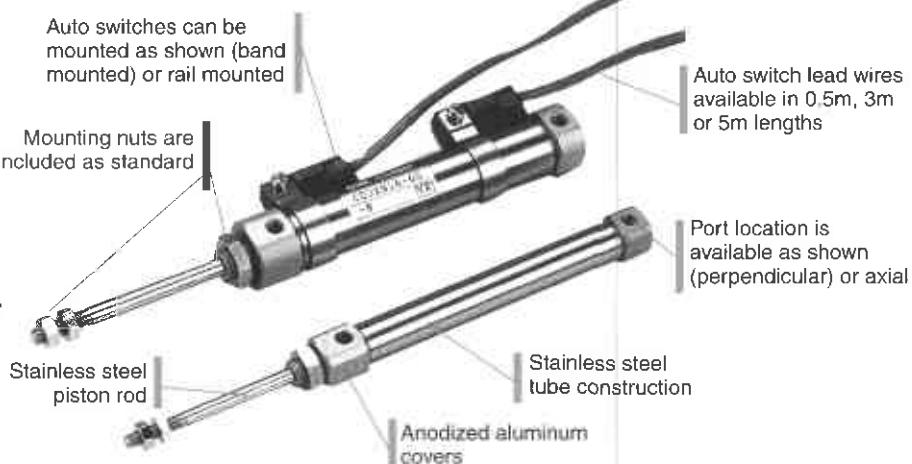

■ High accuracy mounting

■ Small bore cylinder for light duty applications

■ Compact and light weight

■ Non-rotating piston rod optional

■ Available with urethane bumper or air cushion.

Crimp Cylinder

Series CM2

Bore sizes:
20mm, 25mm, 32mm, 40mm

■ Many popular made-to-order options are available such as high temperature, rod boot, adjustable stroke, and many others.

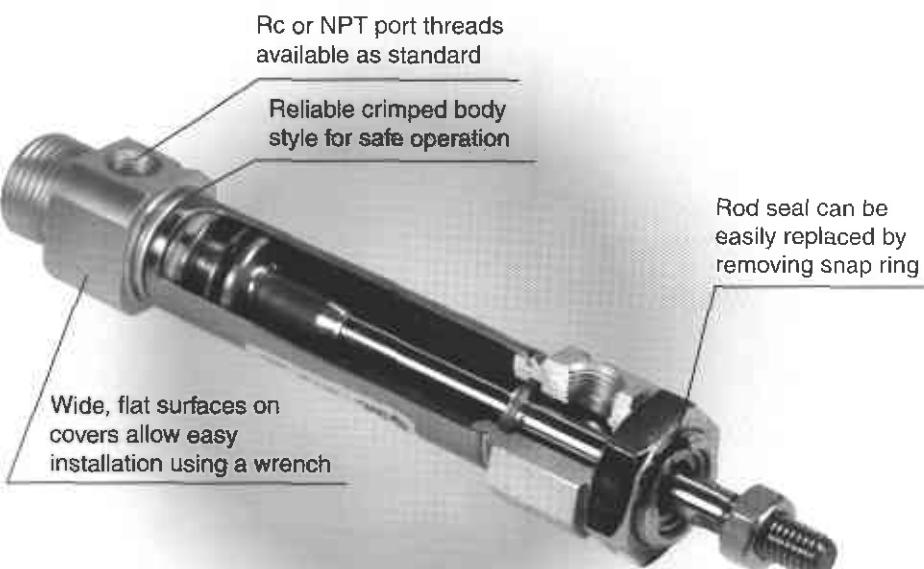

■ Special shaped rod seal provides excellent dust resistance and extends cylinder life.

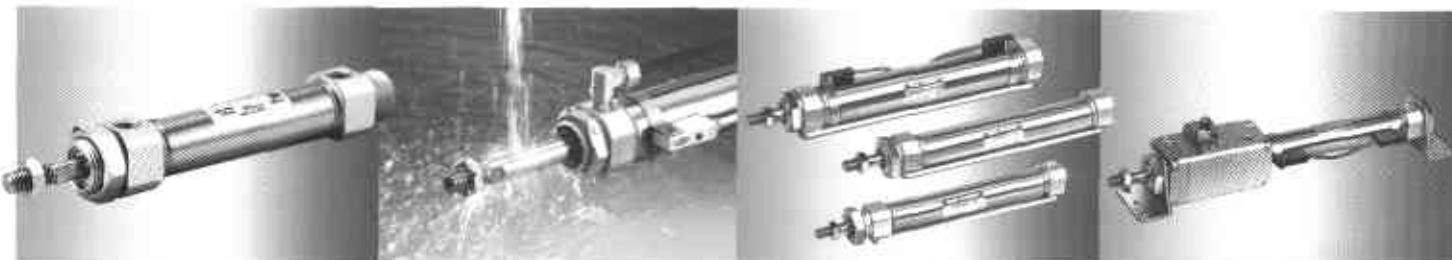

■ Semi-repairable cylinder with precision component design.

■ 14 mounting styles available including foot mount, flange mount, and integrated clevis type.

■ Available with urethane bumper or air cushion.

Also Available:

Series CM2X

Low Speed Cylinder
ø20 to ø40mm

Stable operation at extremely low speeds (0.02 in/sec).

Series CM2 R/V

Splash Proof
ø20 to ø40mm

For use in environments where the cylinder is in direct contact with water or liquid.

Series CM2 P

Cylinder w/Axial Piping
ø20 to ø40mm

Allows piping at head end only.

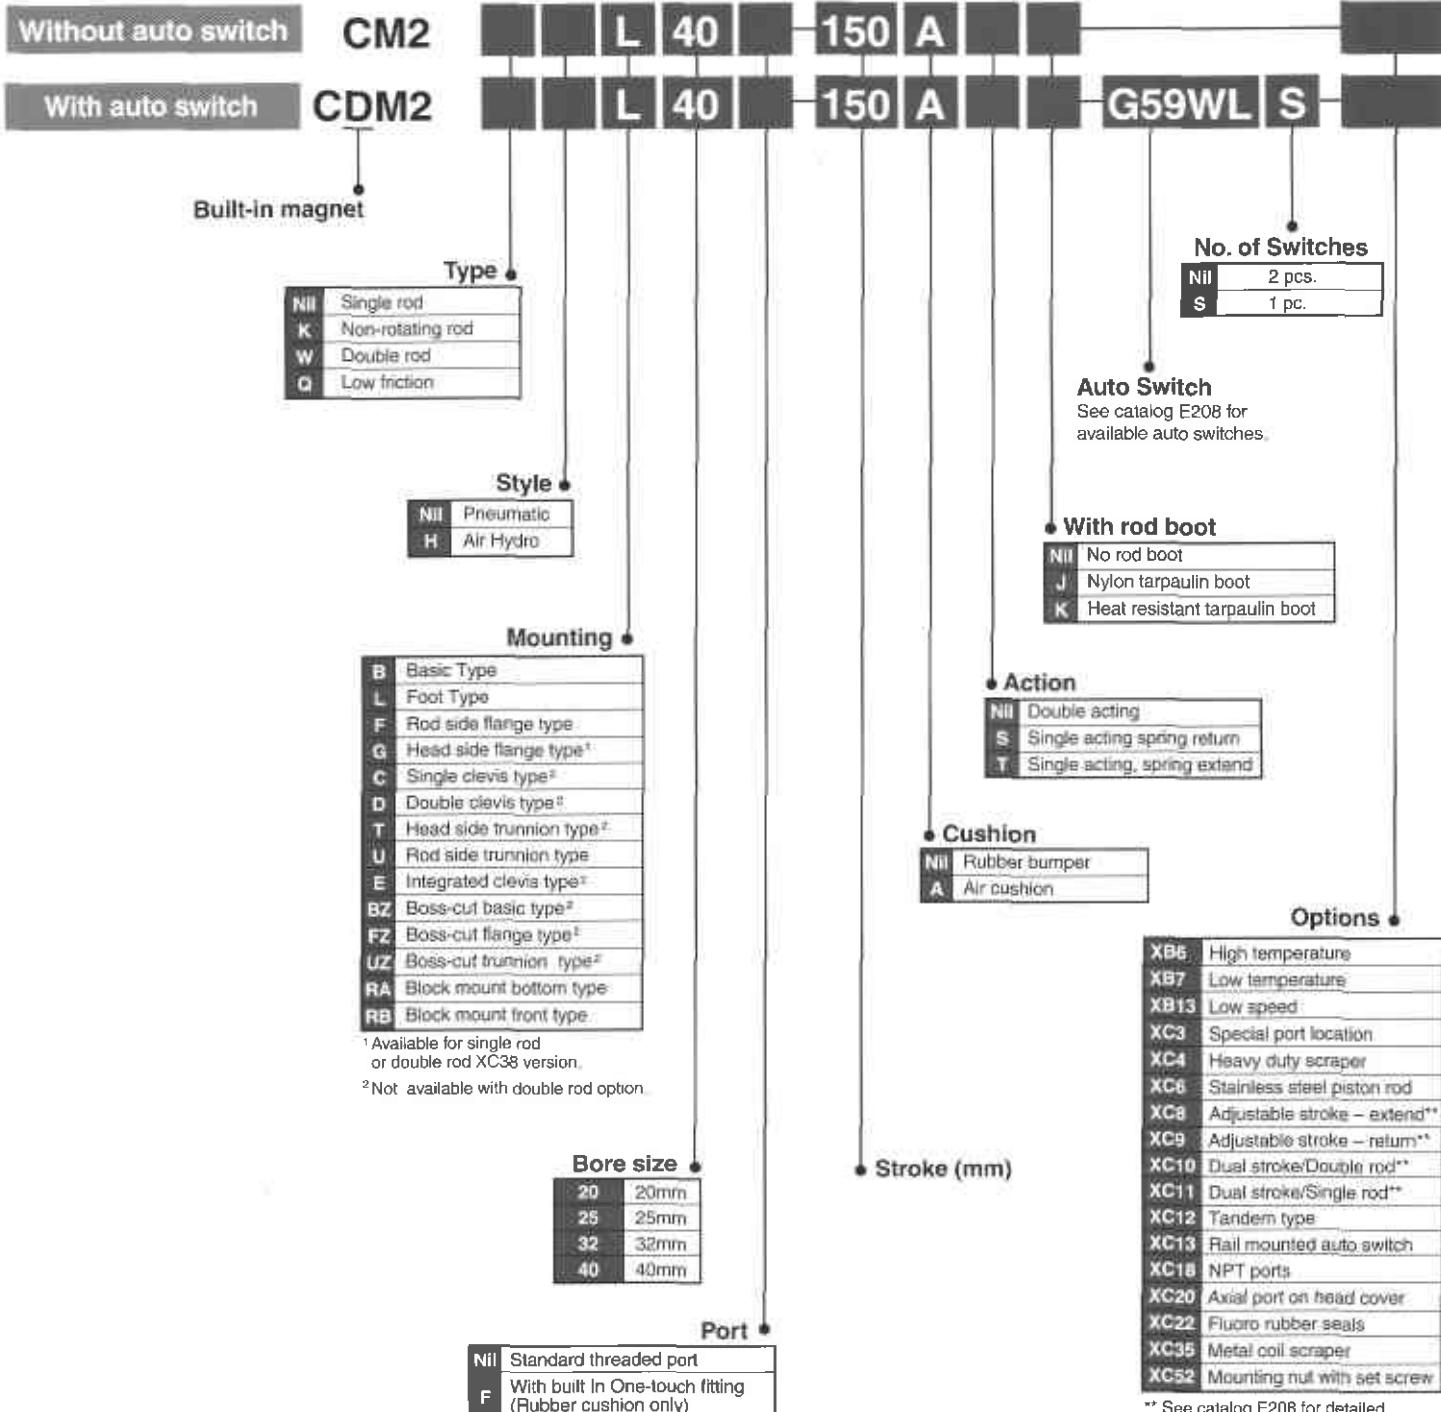

Series CLM2

Fine Lock Cylinder
ø20 to ø40mm

Ideal for intermediate stops, emergency stops and drop prevention.

Crimp Cylinder

How to Order

** See catalog E208 for detailed how to order information.

Stainless Steel Body Cylinder

Series NCM

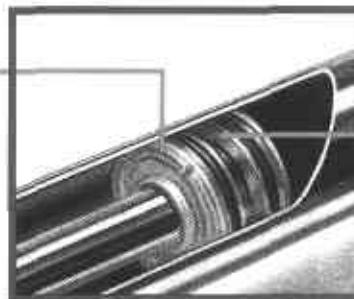

- SMC's NCM series:
The non-repairable cylinder
that is designed to last!
- "Permanent Lube" design
requires no additional
lubrication for cylinder.
- Directly interchangeable
with other manufacturers'
round body series.

5 Actuation Options Available:

- Double Acting – Single Rod
- Double Acting – Double Rod
- Non-rotating Rod
- Single Acting – Spring Return
- Single Acting – Spring Extend

Seal, wear ring, and polished tube work together to absorb side load and decrease overall friction, ensuring long lasting service life.

Chromated aluminum piston improves corrosion resistance.

Other Products:

Series C85
ISO Cylinder
ø8 to ø25mm
Conforms to ISO 6432
and CETOP RP52P.

Series CU
Free Mount Cylinder
ø6 to ø32mm
A space-saving cylinder
with multiple mounting
surfaces.

Series RB
Shock Absorber
Dampening to meet the
high speed requirements
of the modern world.

Series JS
Stainless Steel
Floating Joint
Prevents cylinder
misalignments with superior
corrosion resistance.

Repairable Round Body Cylinder

Bore sizes: 20mm, 25mm, 32mm, 40mm,
50mm, 63mm, 80mm, 100mm

Series NCG/CGT

- Repairable round body cylinder allowing high speed operation up to 40in/sec.

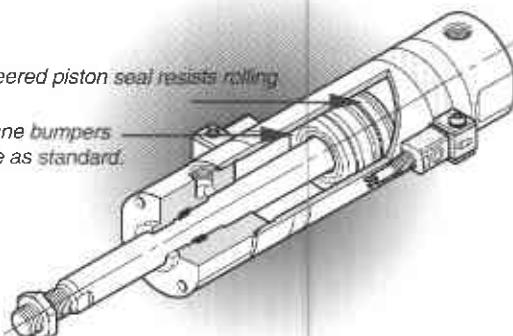

(Note: Maximum speed for 80 & 100mm bore size is 28 in/sec.)

- Available in 8 bore sizes and 9 different mounting styles.

- Cylinder can be integrated with linear guide unit (Series MGG and MGC).

Engineered piston seal resists rolling

Urethane bumpers
available as standard.

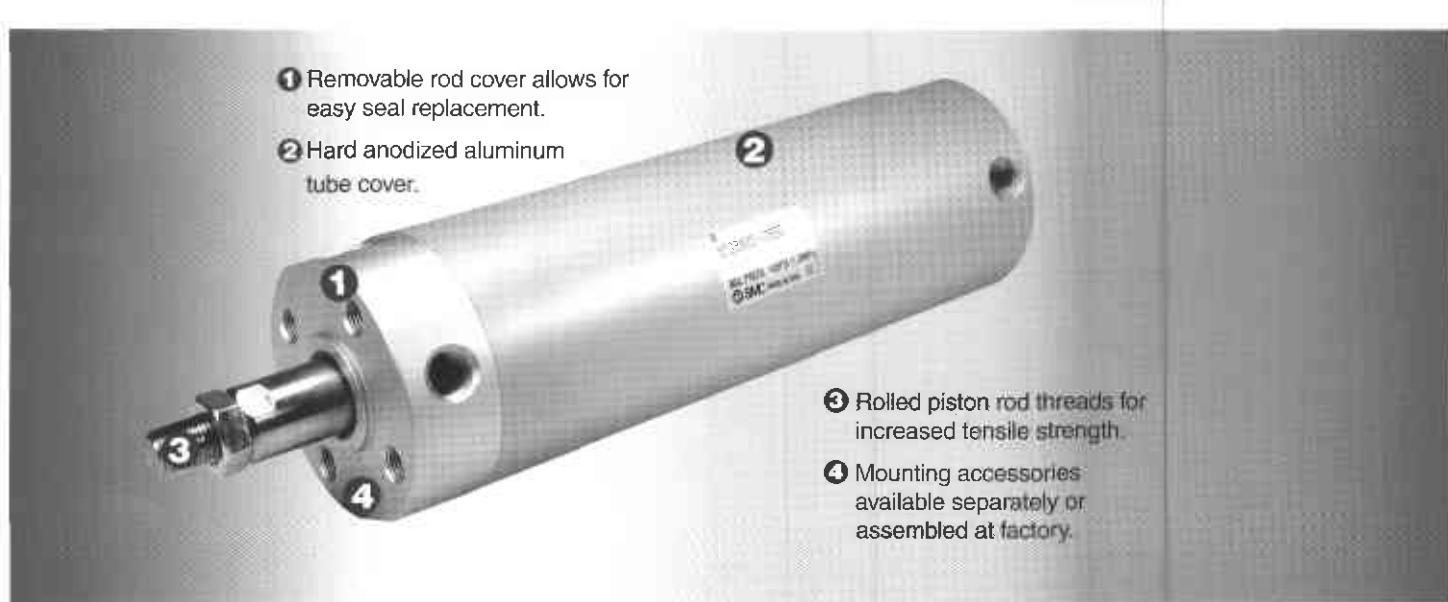

① Removable rod cover allows for easy seal replacement.

② Hard anodized aluminum tube cover.

②

③ Rolled piston rod threads for increased tensile strength.

④ Mounting accessories available separately or assembled at factory.

Also Available:

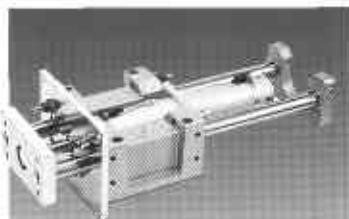

Series RHC

High Power Cylinder

ø20 to ø100mm

Can absorb 10 to 20 times more energy than general purpose cylinders.

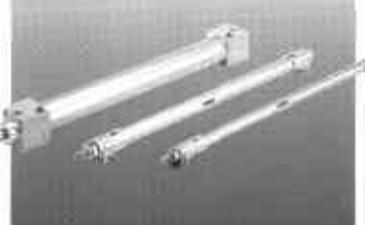

Series MGC

Guided Cylinder

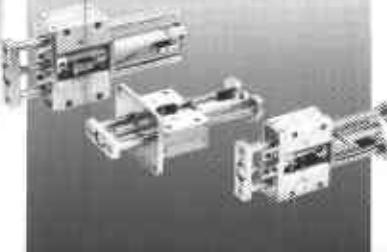

ø20 to ø50mm

Compact version of linear transfer unit.

Series CG5
Stainless Steel Cylinder
ø20 to ø100mm
Stainless steel external parts for use in corrosive environments.

Series MGG
Guided Cylinder
ø20 to ø100mm
Guided linear transfer unit with high lateral load resistance.

Tie Rod Cylinder

Series CA2

Bore sizes:

40mm, 50mm,
63mm, 80mm, 100mm

- ① Rolled tie-rod threads for increased tensile strength
- ② Minimal piston rod deflection
- ③ Mounting accessories available separately or assembled at factory
- ④ Recessed cushion needle for easy air cushion adjustment
- ⑤ Direct mount auto switches available
- ⑥ Rc, NPT or G port threads available as standard
- ⑦ Die cast aluminum covers for reduced weight

Features

5 to 15% reduction in weight

By using die-cast cover, this model is 5 to 15% lighter than Series CA1.

Able to absorb 30% more kinetic energy

The absorption of kinetic energy has been increased by nearly 30% through increased cushion volume and the use of a new cushion seal. Also, the cushion seal life has been increased by nearly 5 times.

Improved cushion capacity

"Floating" cushion seal design eliminates piston rod "bouncing" due to cracking pressure at beginning of stroke.

Easy cushion valve adjustment

Use of an allen wrench in cushion valve adjustment makes fine adjustment easy. The cushion valve does not protrude from the surface of the cover.

Piston rod deflection reduced by 5 to 10%

Piston rod deflection is reduced by the improved accuracy of bushing and piston rod, which minimizes the clearance between these components.

Mounting dimensions are the same as those of Series CA1.

NPT thread and G thread are standardized.

Also Available:

Double Rod Series CA2W

ø40 to ø100mm

Allows various workload connections. Also, increase side load capability.

Smooth Cylinder Series CA2Y

ø40 to ø100mm

Maintains smooth operation at low pressure and low speed.

End Lock Series CBA2

ø40 to ø100mm

Mechanically locks the cylinder position at end of stroke.

Locking Cylinder Series CNA

ø40 to ø100mm

Ideal for intermediate stops, emergency stops and drop prevention.

-XC29	Double knuckle joint with spring pin
-XC30	Front trunnion
-XC35	Metal coil scraper
-XC58	Water resistant/Built-in hard plastic magnet
-XC59	Fluoro rubber seal/Built-in hard plastic magnet

Refer to catalog ES20-176 for details and option compatibility.

NFPA Interchangeable Air Cylinder

Series NCAT

Bore sizes:

ø1.5", ø2", ø2.5", ø3.25", ø4"

① Improved cushion capacity

"Floating" cushion seal design eliminates piston rod "bouncing" due to cracking pressure at beginning of stroke.

② Compact and lightweight design

The square covers are made of an aluminum die casting and provide a lower cost, lighter weight product.

③ Increased kinetic energy absorption

The absorption of kinetic energy has been increased by nearly 30% through increased cushion volume and the use of a new cushion seal.

④ Full port design

Allows for improved piston breakaway.

⑤ Piston Rod

Piston rod available as hard chrome plated carbon steel or stainless steel.

⑥ Rolled piston rod threads

Rolled piston rod threads for increased tensile strength.

⑦ Replaceable rod seal

Engineered rod seal can be replaced without disassembling the cylinder.

⑧ Piston and cushion ring

Piston and cushion ring are mechanically crimped to the piston rod.

⑨ Rugged square covers

Rugged square covers are made of an aluminum die casting.

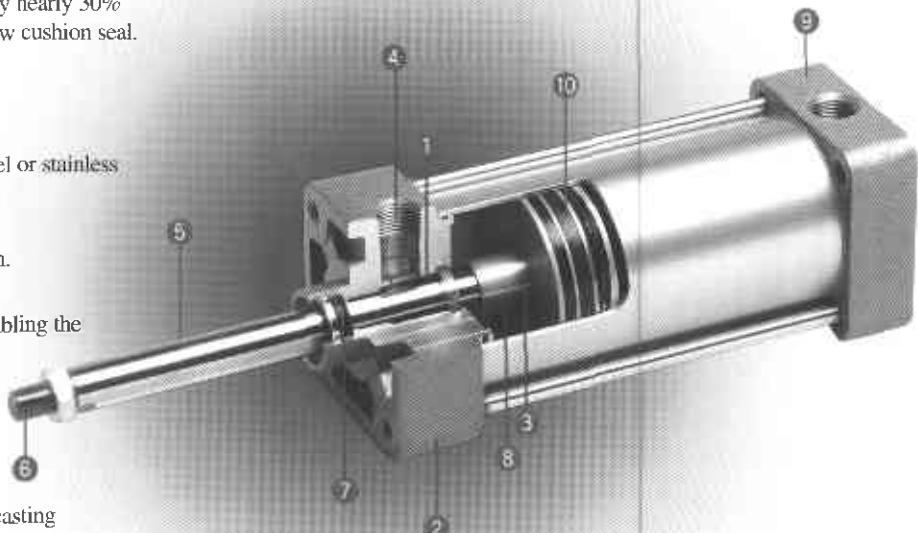

⑩ Magnetic piston available

Full range of NFPA interchangeable mounting configurations

Mounting Dimensions are in accordance with ANSI (NFPA) T3.6.7 R2-1996. Fluid Power Systems and products-Square Head Industrial Cylinders-Mounting Dimensions.

Expanded bore sizes available up to 14" (See catalog N304 -EX)

Make to Order options are available.

Also available : ISO/VDMA Interchangeable Series

Series CP95
Profile Tube
ø32 to ø100mm
Profile design with
enclosed tie-rods.

Series C95N
Locking Cylinder
ø32 to ø100mm
Ideal for intermediate
stops, emergency
stops and drop
prevention.

Series HYC
Hygienic Cylinder
ø32 to ø63mm
Water resistant
cylinder with easy
cleaning configuration.

Compact Cylinder

Series NCQ8

Bore Sizes:

**056 (9/16"), 075 (3/4"), 106 (1-1/16"),
150 (1-1/2"), 200 (2"), 250 (2-1/2")**

- Auto switches can be mounted on multiple sides and do not protrude from the cylinder body
- Hard anodized, extruded aluminum body
- Snap ring design allows for quick and easy seal maintenance
- Female rod thread or male rod thread stud
- Thru-hole or tapped hole mountings
- The NCQ8 has many of the unique design features of SMC's CQS and CQ2 compact series.
- Available as double acting or single acting.

Also Available:

Series CQS
Square Profile

ø12 to ø25 mm

Square body profile is ideal for space-saving applications.

Series C55
Compact ISO Cylinders

ø20 to ø63 mm

Conforms to ISO 21287

Series CGM
Guide Rod Type

ø12 to ø100 mm

Provides high non-rotating accuracy and lateral load resistance.

Series MU
Plate Cylinder

ø25 to ø63 mm

Elliptical piston design allows space-savings.

NCQ8 Design Features

square body allows for close center-to-center mounting

Mounting of Auto Switches on up to 4 Sides

Super Compact Version Available (Magnet Type)

Compact Cylinder

How to Order

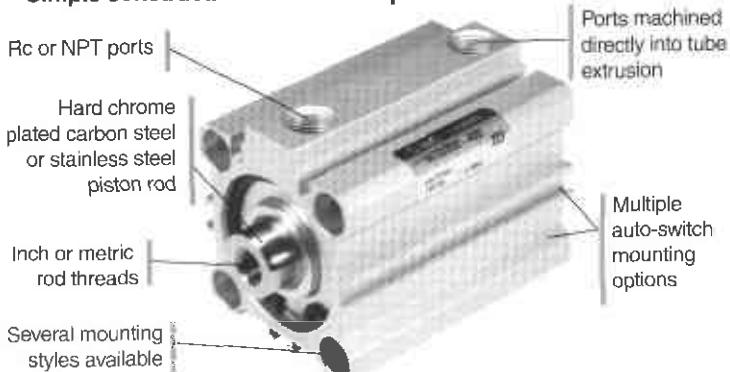

Compact Cylinder Series **NCQ2/CQ2**

Bore Sizes:

**12mm, 16mm, 20mm, 25mm,
32mm, 40mm, 50mm, 63mm 80mm,
100mm, 125mm, 140mm, 160mm,
180mm, 200mm**

- The industry's most comprehensive line of compact cylinders
 - Compact, lightweight and space-saving design
 - Simple construction minimizes repair time

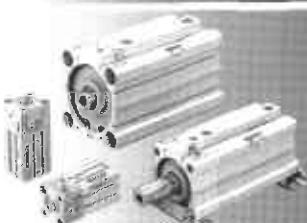

Also Available:

Series RQ
With Air Cushion
e20 to e100mm
Utilizes compact &
innovative air cushion
mechanism.

Series CBQ2
End Lock
ø20 to ø100mm
Mechanically locks
the cylinder position
at end of stroke.

Series CLQ
With Lock
ø20 to ø100mm.
Provides drop prevention
in one direction during
system pressure loss.

Series CQSY/CQZY
Smooth Cylinder
ø12 to ø100mm
Maintains smooth
operation at low pressure
and low speed.

Compact Guide Cylinder

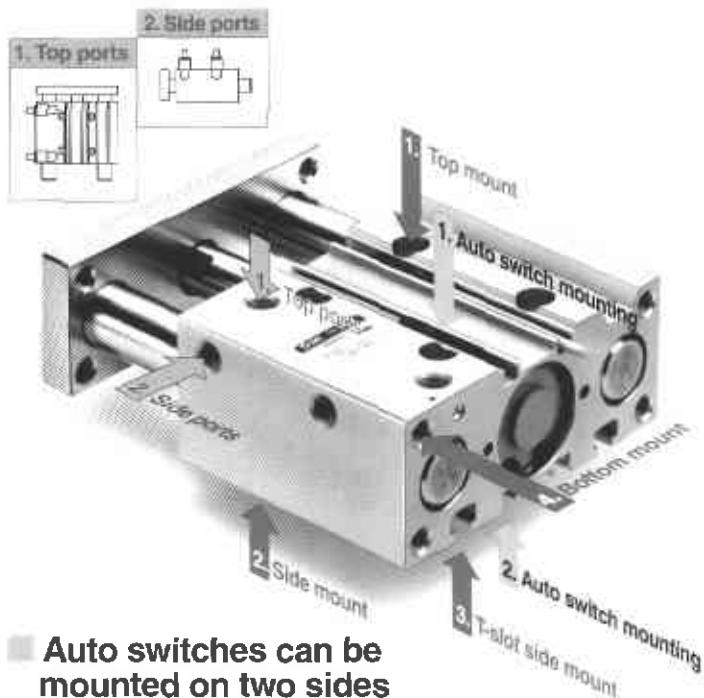

Series MGP

The MGP guided actuator is designed for high side load applications. The actuator utilizes an ultra compact design by incorporating the cylinder as part of the guide body. As the stroke length increases, so does the bearing length. This enhances the cylinder's load capacity. Conventionally designed guided cylinders have a set bearing length resulting in dramatic decreases in side load capacity as stroke lengths increase. The MGP guided actuator offers a vast array of options to suit your automation needs!

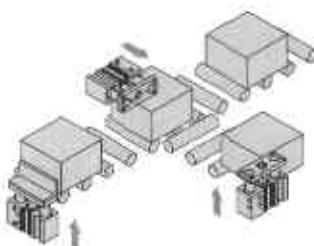

■ Four mounting types provided

■ Piping is possible from two directions

■ Auto switches can be mounted on two sides

Two types of guide rod bearing to accommodate various applications

Slide bearing

The lateral withstand load is more than twice that of a conventional stopper cylinder (round bar type), and is suitable for use with lateral loads accompanied by impact, as in stoppers.

Ball bushing

Suitable for use as a pusher and lifter.

Slide Table

Series MIX

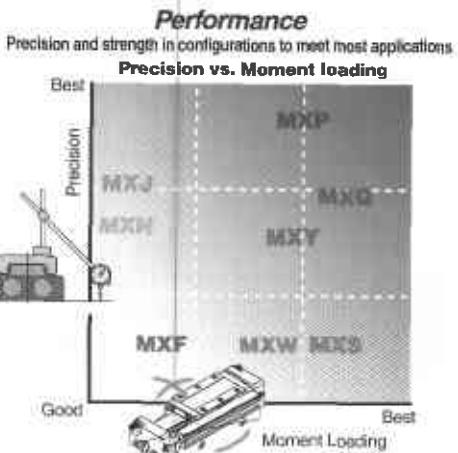

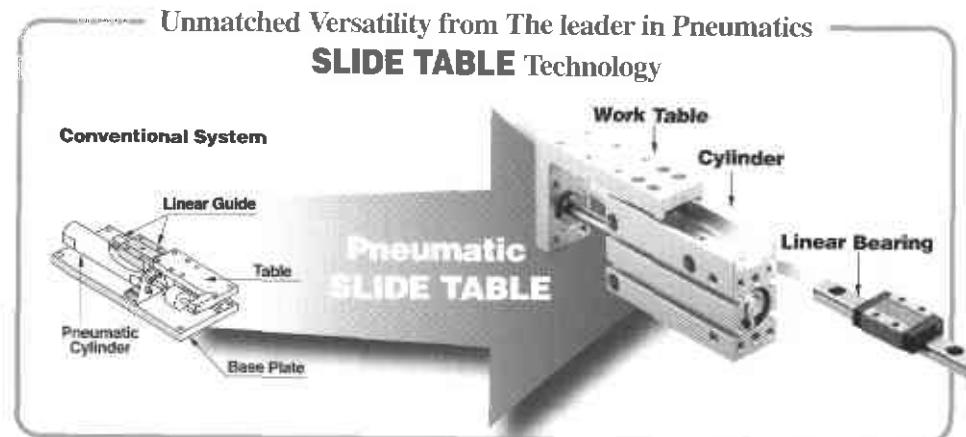

SMC has pioneered the development of compact integration of pneumatic cylinders and guided slide tables.

The result is the widest range of pneumatically actuated slide tables in the industry, the MX family.

The MX slides are available in eight styles to meet a variety of application needs. Series MXS, MXQ, and MXW utilize a twin piston design providing two times the output force for a given bore size.

Unmatched Versatility from The leader in Pneumatics

Dual-Rod Cylinder

Series CXS

Like the MX series, CXS slide units are intended to replace a custom assembly consisting of many components with one integrated and reliable component. CX offers excellent value when the accuracy and moment capabilities of the MX slide are not required. The CX has very good non-rotating accuracy and intermediate to high loading capabilities. The twin piston design provides twice the thrust for a given bore size.

Dual-Rod Cylinder with guide function for pick-and-place applications

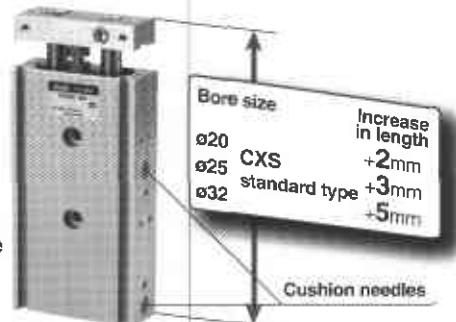

Dual-rod cylinder range is better than ever.

Air cushion type

Series CXS: ø20, ø25, ø32

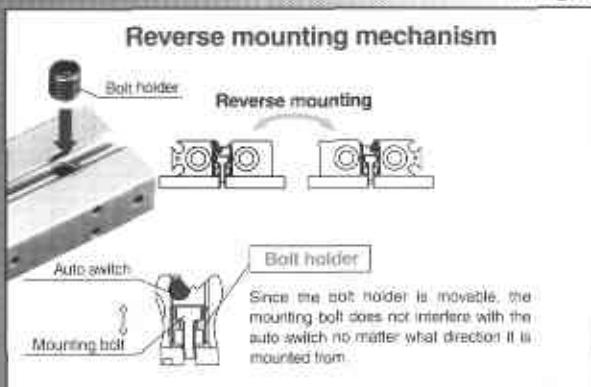

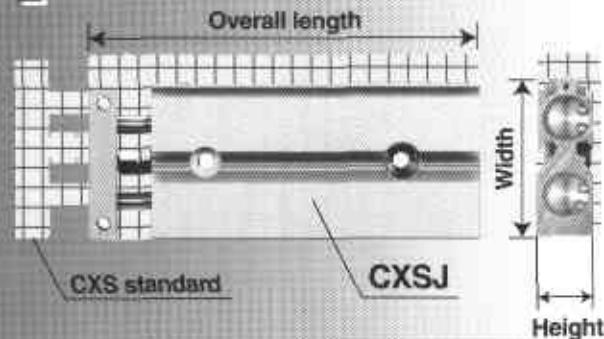

- Air cushion only minimally adds to overall length, compared with the standard type cylinder.

- Improved allowable kinetic energy: Two to three times that of the standard type
- Improved noise reduction: Reduction of more than 6dB is possible.

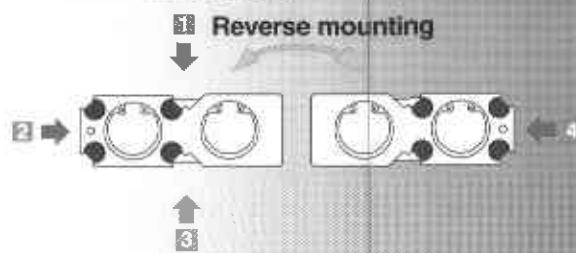

Compact Type Series CXSJ: ø6, ø10, ø15, ø20, ø25, ø32

Smaller and lightweight

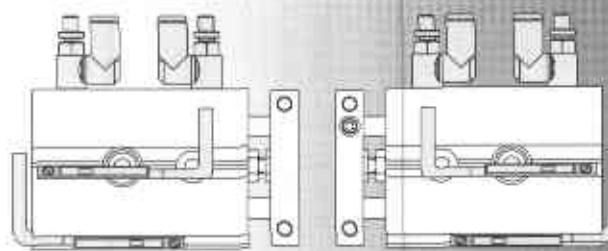

Superior mounting options

- Auto switches can be installed from 4 directions.

Unique air cushion mechanism with no cushion ring

Elimination of the cushion ring used in conventional type air cushions has made it possible to reduce the overall length of the cylinder while retaining all the advantages of a compact profile.

Operating principle

- ① When the piston is retracting, air is exhausted through both A and A' until piston seal H passes air passage A.
- ② After piston seal H has passed air passage A, air is exhausted only through A'. The section marked with slanted lines becomes a cushion chamber, and an air cushion effect is achieved.
- ③ When air is supplied for the piston extension, the check seal opens and the piston extends with no delay.

- X593 Without plate

• (Ball bushing only)

Note) Made to Order options are available for Series CXS standard type only. (Long stroke option XB11 is also available for CXSW.) Refer to catalog ES20-53E and Best Pneumatics 2004 Vol. 8 for details.

Parallel Grippers

Series MH

MHZ2 – High Precision – Many options – Ideal general purpose gripper

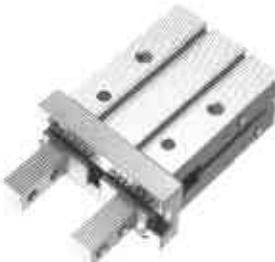

Refer to catalog ES20-140D

The MHZ2 Parallel Grippers are available in several sizes with many options to choose from. High quality, precision, durability, and outstanding value are the hallmark of this gripper.

Series Variations

Series	Bore size (mm)	Action
--------	----------------	--------

Body option		End boss type					Finger option			
Basic type		With O-ring flange (open/closed)	With O-ring flange (closed)	With M3 port	With M5 port	With three nipple	Basic type flanged in open/closed direction	Side tapco	Three nipple in open/closed direction	Flat type finger
Side ported	Side ported									
										
										
										
										
										
										
										
										
										

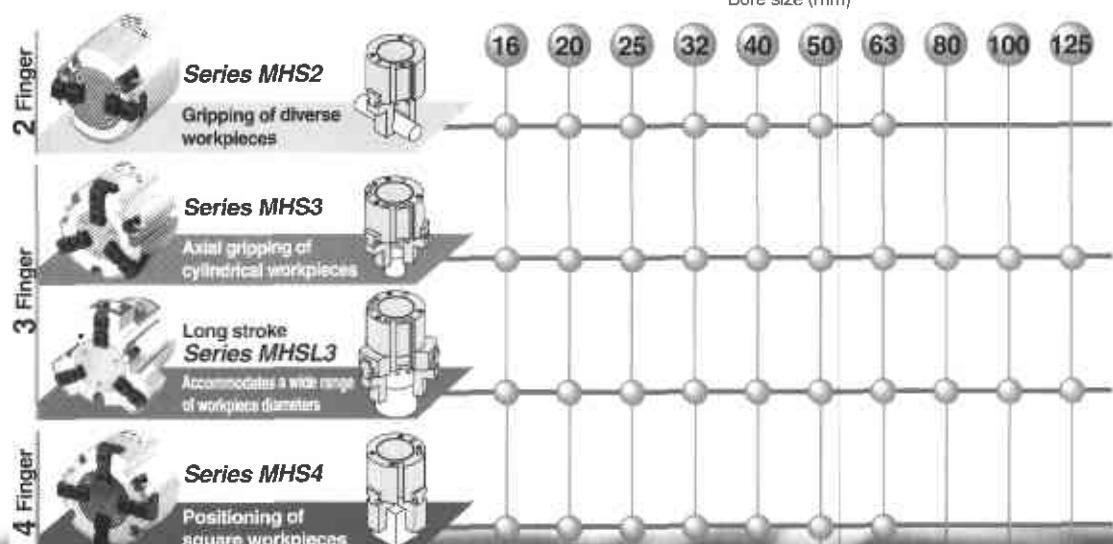

MHS2/3/4/

High grip force – Available with two, three, or four fingers – Good for gripping round or square parts.

MHS Grippers utilize a wedge cam design to minimize their size yet retain a high holding force. The high ratio of force to size makes these grippers well suited for end of arm or space constrained pick and place applications. The two finger MHS2 is good for general purpose gripping. The three finger design of the MHS3 is ideal for round parts. Round or square objects work well with the four finger MHS4.

Refer to catalog E\$20-104F

Series Variations

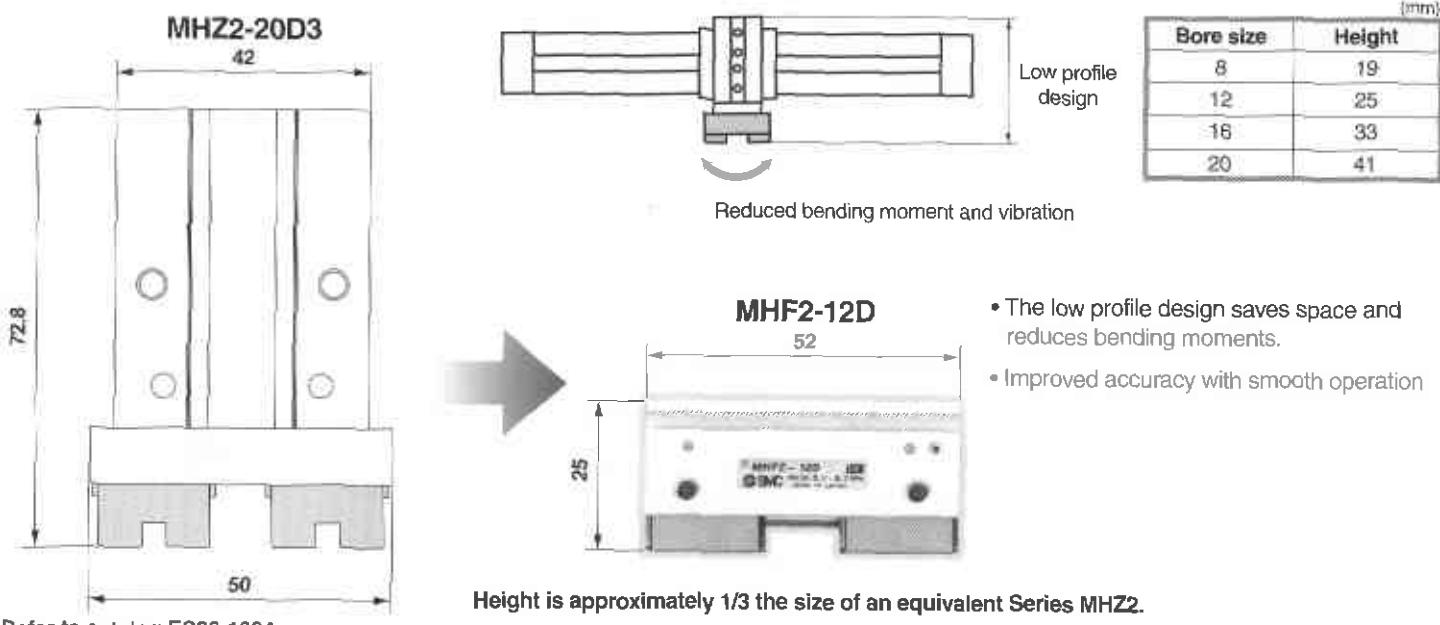

Parallel Grippers

Series MH

MHF2 ~ Very low profile – Reduced height saves space minimizes bending moments in pick and place systems

The MHF2 Low Profile Air Gripper uses a low profile design to save space and reduce bending moments. The height is approximately 1/3 that of conventional air grippers with equivalent gripping force. The gripper jaws are guides using high precision and high rigidity ball bearing guides. A double air piston construction achieves compact design and strong holding force.

Refer to catalog ES20-166A

MHL2 ~ Long stroke and wide opening – Great gripping large parts of various sizes

Series MHL air grippers are designed for applications that require a wide travel range of the gripper fingers. The MHL is good for gripping many different sized parts. Finger motion is synchronized by a rack and pinion mechanism. The double piston construction creates large holding forces.

- One unit can handle workpieces with various diameters
- A large amount of gripping force is provided through the use of a double piston mechanism, while maintaining a compact design
- Double end type oil impregnated resin bearings with a metal backing are used for all shafts
- Fingers synchronized by a rack and pinion mechanism
- Built-in dust-protection mechanism
- A high degree of freedom for mounting
- Auto switch mountable

Angular Grippers

Series MH

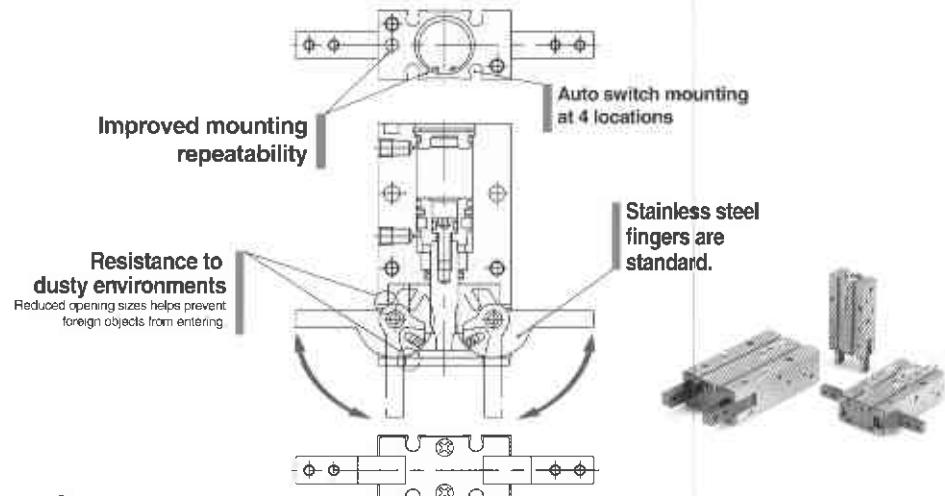

MHY2/MHW2 180° Angular Grippers

The MHY2 and MHW2 grippers are perfect for applications where space saving is a necessity. In addition to its compact size, each of the two fingers, synchronized by a rack and pinion mechanism, rotates back perpendicular to the gripper body. In this position, the gripper will only require clearance for the body allowing for X-Y movement without an additional Z-axis linear actuator.

Refer to catalog N366

Cam Style — Light and compact size in small bore sizes

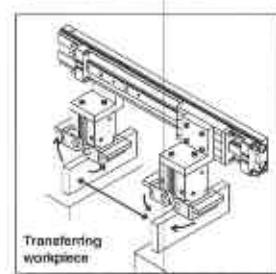

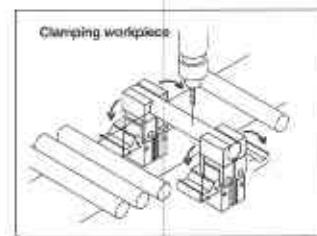

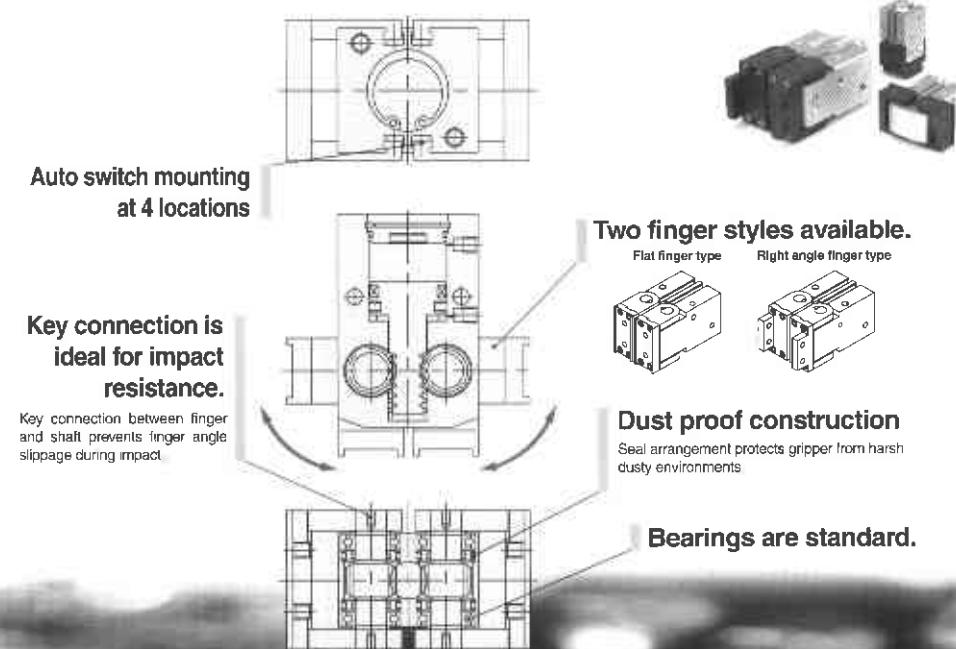

Series Variations

	Bore size (mm)	Applicable auto switch
Cam style Series MHY	10 16 20 25 32 40 50	Solid state switch D-Mini CAN type

MHT Toggle gripper

Toggle mechanism provides strong and stable holding force – Gripper holds firm even when air pressure is lost.

The MHT Toggle gripper is designed to give reliable gripping support. The toggle mechanism holds even when air pressure drops. When the gripper fingers are closed, the toggle mechanism and all external parts are treated to resist corrosion.

Refer to catalog E241A

Rotary Table/Rack-and-Pinion Type

Series MSQ

SMC's MSQ Series Rotary Actuator is a rack and pinion style rotary actuator with a table supported by a special bearing which allows for radial and moment loading. MSQ Rotary actuators are perfect for pick and place automation!

Large rolling element bearing

3 to 4 times higher axial load
(compared with series CRQ)

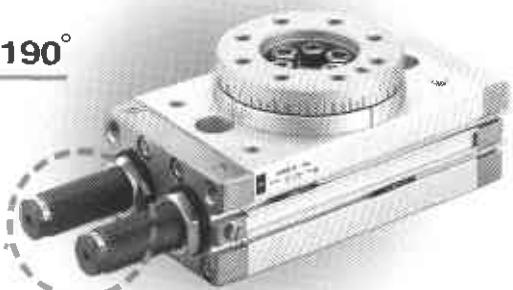

Pivoting angle
adjustment range: 0 to 190°

Basic type
MSQB

With internal shock absorber

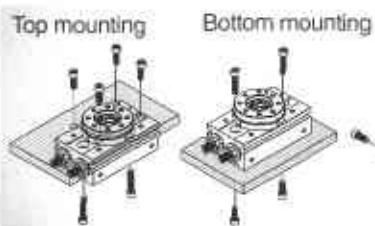

2 to 5 times more kinetic energy
(compared with an adjustment bolt)

Flexible mounting

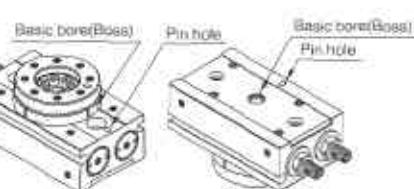

Compact design also saves space for wiring and piping.

Free mounting

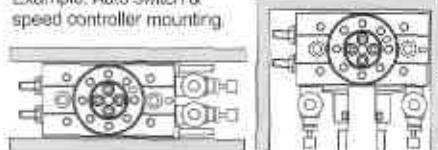

Side
mounting

Easy alignment for mounting

Wiring and piping direction can be selected depending on mounting conditions.

Example: Auto switch & speed controller mounting

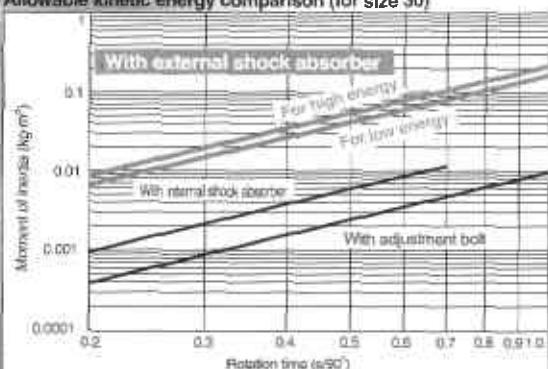

External shock absorber types

4 to 10 times more allowable kinetic energy

(Compared with external shock absorber type)

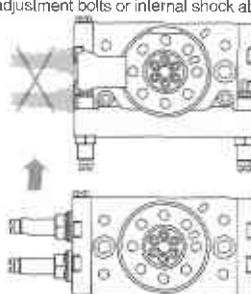

2 types of shock absorbers are available, for low energy and high energy.

Allowable kinetic energy comparison (for size 30)

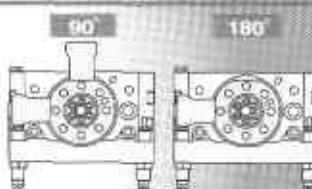

Total length shortened

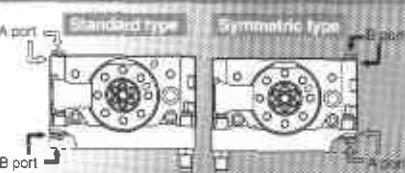

Longitudinal mounting space is reduced because there is no protrusion from adjustment bolts or internal shock absorbers.

Rotation angle: 90°, 180°

Left / Right symmetric type

Rotary Table/Rack-and-Pinion Type

B	All stations with back pressure check valve Note 1)
D	With DIN rail (rail length: standard)
D□	With DIN rail (rail length: special) Note 2)
K	Special wiring specifications Note 3) (except for double wiring)
N	With name plate
R	External pilot Note 4)
S	Direct exhaust with built-in silencer Note 5)

* When specifying two or more options, list symbols in alphabetical order. Example: -BRS

Note 1) When using the back pressure check valve for the necessary stations only, enter the back pressure check valve part no. and indicate the number of manifold stations in the specification sheet.

Note 2) For special DIN rail length, indicate "D□" (Enter the number of stations inside □)

Example: -D08

In this case, stations will be mounted on a DIN rail for 8 stations regardless of the actual number of manifold stations.

Indicate "-D0" for the option without DIN rail.

Note 3) Be sure to indicate the wiring specifications in the specification sheet.

Note 4) For external pilot option, "-R", indicate the external pilot specification "R" for the applicable valves as well.

Note 5) The built-in silencer type does not satisfy the IP67 standard.

⑤ Input block (Fill out for I/O unit only)

NII	Without SI unit/input block (SD0)
0	Without input block
1	With 1 input block

⑦ Options

NII	None
K	Special wiring specifications Note 1) (except for double wiring)
N	With name plate Note 2) (available for T Kit only)

* When specifying two or more options, list symbols in alphabetical order Example -KN

Note 1) Be sure to indicate the wiring specifications in the specification order sheet

Note 2) The mounting position of the name plate is on the top face of the cover for the terminal block box.

Note 1) Numbers inside () indicate the maximum number of solenoids for mixed single and double wiring. The maximum number of stations is determined by the total number of solenoids. In the case of mixed wiring, use the option symbol *-K."

5-port Solenoid V

Lateral Plug in Style Manifold
Series SV1000/2000/3000/4000

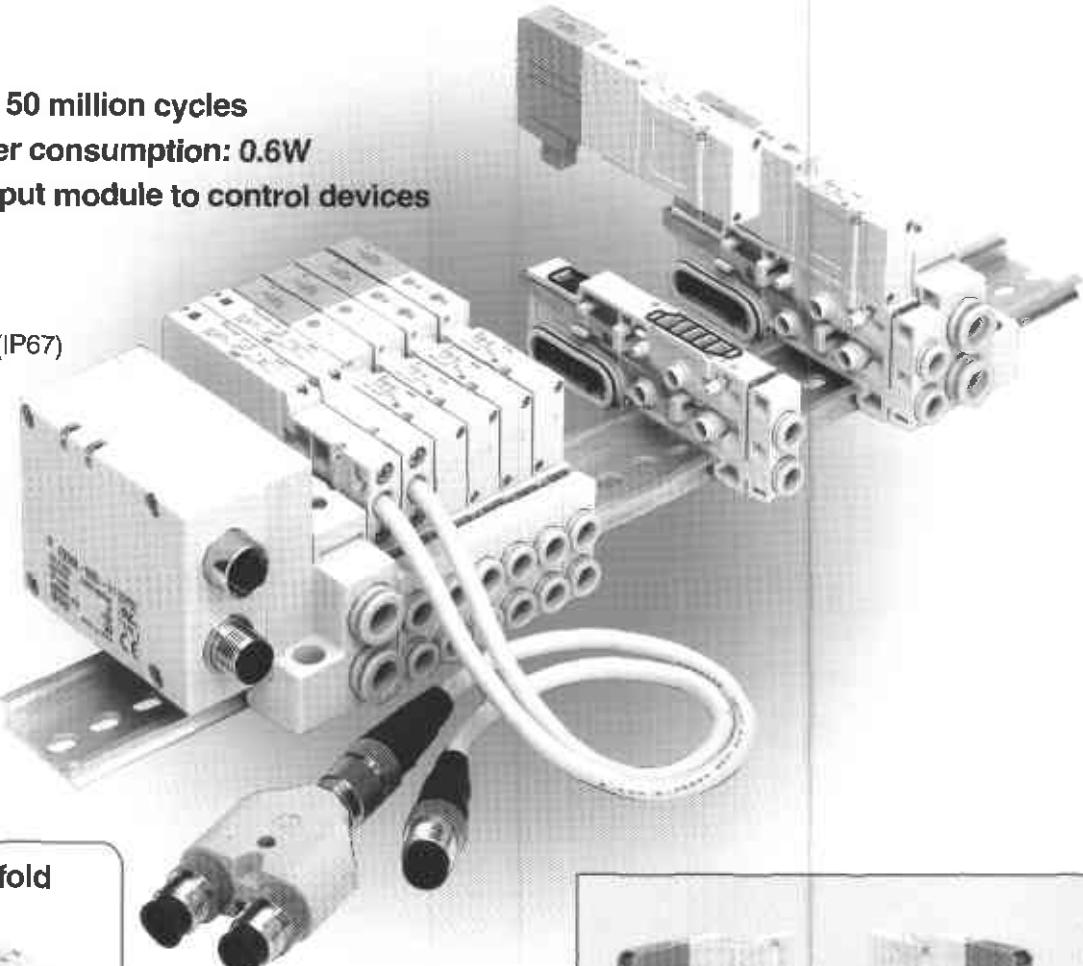

Series SV

The use of multi-pin connectors to replace wiring inside manifold blocks provides flexibility when adding stations or changing manifold configuration.

Long life: 50 million cycles

Low power consumption: 0.6W

Relay output module to control devices

Electrical wiring

Decentralized Serial Wiring (IP67)

Serial Wiring (IP67)

Circular Connector (IP67)

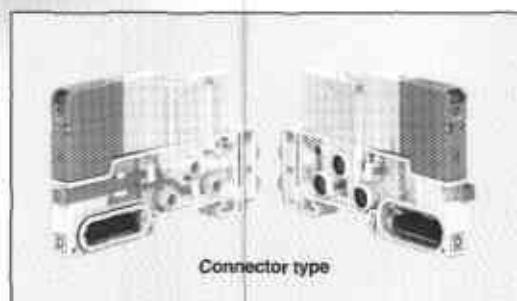

D-sub Connector

Flat Ribbon Connector

Also available SJ manifold

Compact low profile cassette manifold valves
uses V060 (SJ2000) and V100 (SJ3000)
pilot valves for low power consumption

Connector type

5-port Solenoid Valve

Series SV

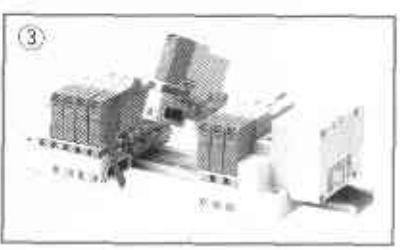

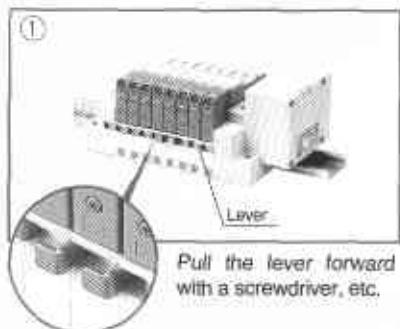

Two Type of Manifold Options

Cassette base type manifold

(Series SV1000/2000)

Cassette base type manifolds offer the ultimate in flexibility.

Manifold sections can be added using a simple release mechanism.

Tie-rod base manifold

(Series SV1000/2000/3000/4000)

Conventional tie-rod base type manifolds with 34 pins connector allows up to 16 stations with double solenoids.

Compact size with large flow

Model (Series)	Manifold pitch (mm)	Rubber seal Cv	Applicable cylinder size (mm)
SV1000	10.5	0.28	Up to ø50
SV2000	16.0	0.48	Up to ø80
SV3000	20.5	0.93	Up to ø100
SV4000	24.0	1.60	Up to ø125

Interface regulator

To regulate pressure of A or B ports depending on application

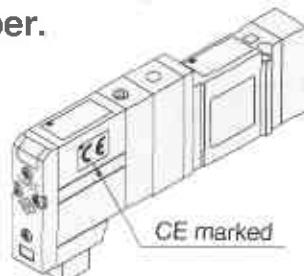

4-position dual 3-port valves option for Series SV1000/2000

Available configurations [N.C./N.C.], [N.O./N.O.], and [N.C./N.O.].

Serial Communication Manifolds

- SV manifolds with EX250 serial network adaptor are available for DeviceNet, Profibus-DP, As-i, CC-link, ContralNet and CANopen protocols, with 64 I/O.
- These manifolds also accommodate gateway type serial wiring to control 4 branch lines, which offers flexibility in choosing manifold mounting location. The Gateway unit features 128 I/O and supports DeviceNet, Profibus-DP and Remote I/O protocols.

Product is CE compliant with standard part number.

5-port Solenoid Valve

How to Order

Manifold – Flat Ribbon Cable Connector

Note 1)

Double wiring specification:
Single, double and 3 position solenoid valves can be used on all manifold stations.

Note 2)

Specified layout: Indicate wiring specifications on a manifold specification sheet. Note that double and 3 position valves cannot be used where single solenoid wiring has been specified.

Series	Double wiring specification

5-port Solenoid Valve

How to Order

Interface regulator

Series SV1000

SV1 0 00 - 05 - P

- Applicable valve

0	For single and double
3	For 3-position

- Option

For odd no. station	
N5	With PSI pressure gauge
05	With metric pressure gauge
For even no. station	
N6	With PSI pressure gauge
06	With metric pressure gauge
M1	Without pressure gauge

- Regulator port

P	P port
A1	A port (P port control type A port regulated)
B1	B port (P port control type B port regulated)

Note) Note that a part number for Series SV1000 with pressure gauge differs depending on the position of the station (odd no. or even no.) on which the manifold is mounted to prevent the pressure gauges from interfering each other.

Note) Note that a part number of the valve for single/double and 3-position differs due to the difference in length of the solenoid valve. When 3-position valve is used on the same manifold, all valves must be a 3-position valve.

Series SV2000, 3000, 4000

SV 2 000 - 00 - P

- Series

2	SV2000
3	SV3000
4	SV4000

- Option

N0	With PSI pressure gauge
00	With metric pressure gauge
M1	Without pressure gauge

- Regulator port

P	P port
A1	A port (P port control type A port regulated)
B1	B port (P port control type B port regulated)

3/5-port Solenoid Valve Series VQZ

5 Port Solenoid Valve Metal Seal/Rubber Seal Body Ported

Compact design
with large flow capacity

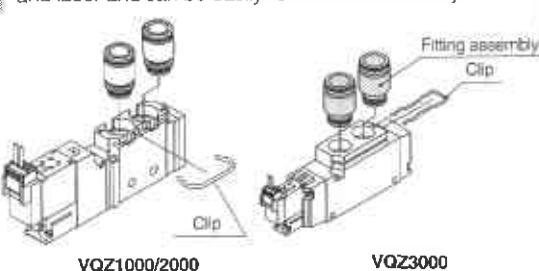

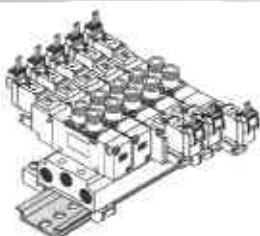

Both 3 and 5 port valves
can be mounted on the
same manifold.

High speed and long service life

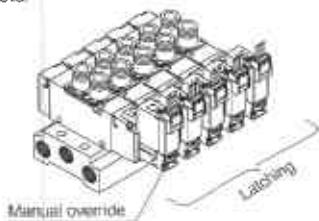

Response time	Life	* Metal seal, single solenoid with light/surge voltage suppressor, according to SMC life test conditions.
VQZ1000 10 ms	200 million cycles	
VQZ2000 12 ms		
VQZ3000 15 ms		

DIN rail mounting

VQZ1000/2000 VQZ3000

All solenoids on one side
Optional latching coil valve operates the same as a 2 position/double solenoid valve but uses only one solenoid. This saves space and wiring costs.

5 Port Solenoid Valve Metal Seal/Rubber Seal Base Mounted

Model	Manifold pitch (mm)	Flow Cv		Cylinder size
		Metal seal	Rubber seal	
VQZ1000	10	0.17	0.32	Up to ø63
VQZ2000	15	0.40	0.53	Up to ø100
VQZ3000	18	0.74	1.20	Up to ø100

3 Port Solenoid Valve Metal Seal/Rubber Seal

Model	Valve Construction	Type Seal	Flow Cv	
			P to A port	A to R port
VQZ100	N.C. Valve	Poppet	0.17	0.14
		Metal	0.30	0.33
VQZ200	N.C. Valve	Rubber	0.39	0.45
		Metal	0.31	0.31

Vacuum control model

Manifolds available

IITV20

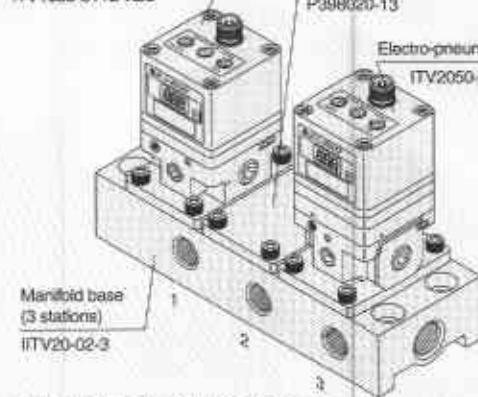

How to Order Manifold Assemblies

Example

Electro-pneumatic regulator
ITV1000-3115-X26

Blanking plate assembly
P398020-13

Electro-pneumatic regulator
ITV2050-212S-X26

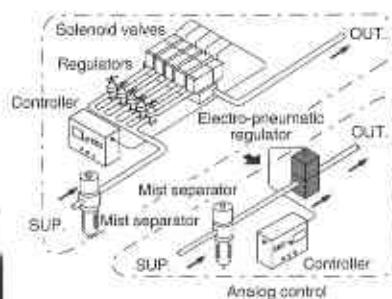

Note 1) Electro-pneumatic regulators are counted starting from station 1 on the left side with the OUT ports in front.

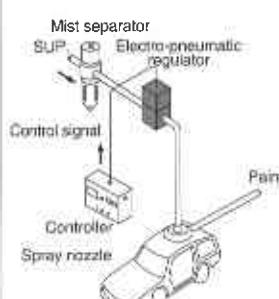

Note 1)

Application example

Analog multistage control

Control of electro-static spraying

Electro-Pneumatic Regulator

How to Order

ITV₂₀¹₃ 1 0 - 01 2 S -

Pressure Range

1	0.1MPa (45.5 PSI)
3	0.005 to 0.5MPa (72.5 PSI)
5	0.005 to 0.9MPa (130.5 PSI)
9	-80kPa (-23.6inHg) (ITV2000 only)

Supply Voltage

0	24VDC
1	12 to 15VDC

I/O code

I/O code	Input signal	Output signal
01	4 to 20mAADC	1 to 5VDC
02	4 to 20mAADC	NPN
03	4 to 20mAADC	PNP
04	4 to 20mAADC	4 to 20mAADC
11	0 to 20mAADC	1 to 5VDC
12	0 to 20mAADC	NPN
13	0 to 20mAADC	PNP
14	0 to 20mAADC	4 to 20mAADC
21	0 to 5VDC	1 to 5VDC
22	0 to 5VDC	NPN
23	0 to 5VDC	PNP
24	0 to 5VDC	4 to 20mAADC
31	0 to 10VDC	1 to 5VDC
32	0 to 10VDC	NPN
33	0 to 10VDC	PNP
34	0 to 10VDC	4 to 20mAADC
40	Preset input	N/A

Display Units

NII	MPa [†]
2	kgf/cm ² *†
3	bar*†
4	PSI*†
5	kPa

[†]Not available ITV209□

*Made to order

Cable

S	Straight type 3m
L	Right angle type 3m*
N	No cable connector*

*Made to order

Bracket

NII	Without bracket
B	Flat bracket*
C	L bracket*

*Made to order or purchase separately

Port Size

	1000	2000	3000
1	1/8"	●	
2	1/4"	●	●
3	3/8"	●*	●
4	1/2"		●

*Not available ITV209□

Port Thread

NII	Rc
N	NPT*
T	NPTF*
F	G*

*Made to order

Optional Specifications

NII	Standard specification	—
O	CE marked	1, 17, 18, 19
X26	For manifold mounting	2, 3, 15
X37	CE marked DeviceNet compatible	4, 5, 6, 8, 14
X38	CE marked 16 preset type	4, 5, 7, 10
X80	DeviceNet compatible	5, 6, 8, 14
X81	16 preset type	5, 7, 10, 16
X88	0.1s high speed response	2, 3
X93	Digital input type	5, 6, 9, 11
X102	Reverse output	12, 13
X153	CE marked for manifold mounting	3, 15
X154	CE marked 0.1s high speed response	3
X155	CE marked DeviceNet compatible	4, 5, 6, 8, 14
X156	CE marked 16 preset type	3, 5, 7, 10
X157	CE marked digital input type	3, 5, 6, 11

NOTES

- 1 No charge for CE marking.
- 2 ITV1000 only
- 3 ITV2000 only (except ITV209□)
- 4 ITV3000 only
- 5 Input code 4 only
- 6 Output code 0 only
- 7 Output code 2 or 3 only
- 8 No pressure display
- 9 Straight connectors
- 10 4-bit input gives 16 pressure presets
- 11 10-bit parallel input
- 12 Not available with preset input type
- 13 100% output at 0% input; 0% output at 100% input
- 14 MPa display units only
- 15 Port size 2 (1/4") only
- 16 Right angle L cable not available
- 17 Not available with monitor output 4
- 18 Not available with pressure range
- 19 "-40" input - output combination not available
